NEW QUESTION: 1 A company has seen an increase in ransomware across the enterprise. Which of the following should be implemented to reduce the occurrences?
A. ARP inspection
B. Web content filtering
C. Intrusion detection system
D. Port filtering
Answer: B
Explanation: Ransomware is a type of malware which restricts access to the computer system that it infects, and demands a ransom paid to the creator(s) of the malware in order for the restriction to be removed. The best way to avoid ransomware include proactive measures like the following: Don't click on any URL or open an attachment you are not expecting. Implement an email content filtering service Install a web content filtering service Invest in leading end point security software solutions

NEW QUESTION: 2 Note: This question is a part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a Power BI model that contains two tables named Sales and Date. Sales contains four columns named TotalCost, DueDate, ShipDate, and OrderDate. Date contains two columns named Date and Time. The tables have the following relationships: * Sales [DueDate] and Date [Date] * Sales [ShipDate] and Date [Date] * Sales [OrderDate] and Date [Date] The active relationship is on Sales [DueDate]. You need to create measures to count the number of orders by [ShipDate] and orders by [OrderDate]. You must meet the goal without loading any additional data. Solution: You create a calculated table. You create a measure that uses the new table. Does this meet the goal?
A. No
B. Yes
Answer: A
