Pass Guaranteed Quiz C-TS422-2023 - The Best SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Exam Overview

You can download your purchases on the maximum of 2 (two) computers, One year updates freely, Q4: How long can I get my SAP C-TS422-2023 questions and answers after purchasing?

It is high time to prepare your C-TS422-2023 actual test to improve yourself, We will help you in the first time, Both the formats are easy-to-use and portable and offers you real simulation.

We offer payments through Paypal-one of the most trusted payment providers which can ensure the safety shopping for C-TS422-2023 study torrent, You can easily get the C-TS422-2023 exam certification by using the C-TS422-2023 study material.

Especially of those expensive materials that cost a fortune while help you a little, We know the key knowledge materials about C-TS422-2023 exam so that we can always compile valid exam study guide.

Still not satisfied, And the trail version is free for customers, After you purchased our BraindumpsQA's C-TS422-2023 exam materials, we offer you free update for one year.

NEW QUESTION: 1Which of the following is a description of the SCC function from the subrack? Which one is wrong?**A.** DCN message forwarding**B.** Protection switching protocol processing of this subrack**C.** From the subrack board status management**D.** Processing of overhead**Answer: B**

NEW QUESTION: 2**A.** Option **AB.** Option **CC.** Option **ED.** Option **BE.** Option **D****Answer: A,D**

NEW QUESTION: 3You have the following customers; Customer A. Customers The customers report the following issues:You need to resolve the issues.What should you do? To answer, drag the appropriate actions to the correct customers. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes in scroll to view content. NOTE: Each correct selection is worth one point.**Answer:** Explanation:Explanation:References: <https://docs.microsoft.com/en-us/dynamics365/customer-engagement/admin/connect-exchange-server-on-premises>Topic 1, Case Study LamnaCase Study:This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study.At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.To start the case studyTo display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.**Background**Current processes Dynamics 365 Lamna has been using Dynamics 365 and Microsoft Office 365 for three years. Access to Dynamics 365 is limited to childcare workers. Support staff only have access to Office 365 applications. There is a high turnover rate among childcare workers, so there is often a rush to hire replacements. Childcare workers are often hired on weekends and start work the following Monday. The administrator maintains a list of apps that are approved for use and makes the list available to all Dynamics 365 users. Child registration When a parent registers a child, workers collect information such as known allergies, emergency contact information, list of medications, and scans of signed consent forms for the child. Additional information is collected through the year including field trip consent forms and an annual feedback. Intake

Every day an employee records each child's arrival time, departure time, and the name of the person who picked up the child in an attendance log. Each record includes a field to enter emergency contact information for the child. This field often remains blank since the childcare worker is too busy to populate this information. Attendance records are created from a child record. The supervisor reviews an attendance log at the end of day for each team of workers. Reports are created from Microsoft Word templates for the healthcare workers and documents are stored in Microsoft SharePoint. You create a Child Attendance report and complete testing of the report in a sandbox environment. The report is ready for deployment to the production environment. The child attendance log must be accessible by all staff members. A Child Attendance report is also required, as this information is often accessed at the parent's request. All fields for collecting additional information must be hidden by default. In order to make the process of recording attendance information more efficient, workers must create an attendance record for each child and add the child to the record. If a child is not picked up by 6:00pm, a text message must be sent to the parents notifying them of additional charges for late pickup. Microsoft Flow is used to deliver text messages to parents about additional charges for late pickup. Medication Complex information such as medications must be contained in a sub-grid on the child's record. When children change age groups, all of their records must be available to the new team of childcare workers. A child's medication record must no longer be viewable by the previous group of childcare workers. System customization All customization and testing are performed in the sandbox environment and then moved to production. To simplify management of Dynamics 365, Lamna Healthcare keeps all components in the default solution but maintains a unique prefix. Dynamics is a non-code environment. Option sets must be used whenever possible. For example, the allergies field displays a list of common allergies. You must include an option named Other in each option set to allow users to enter a value that is not available in the option set. When Other is selected, the form must display a text field that requires entry. Problem statements Parents of a child named Elizabeth recently changed her surname. The parent hands in a field trip consent form that includes the new surname. The support worker cannot find the child in the system. Users report having to sign back into the system very frequently, often multiple times during the course of a period of usage. When children move to new age groups, medication records for the child are not visible to the new group's childcare workers.

NEW QUESTION: 4 DRAG DROP You need to configure the environment to allow replication from the existing domain to Office 365. Which components should you use? (To answer, drag the appropriate products or technologies to the correct location or locations in the answer area. Each product or technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)
Select and Place:
Answer:
Explanation: Explanation: Box 1: AD FS 2.0 Box 2: AD FS 2.0 Proxy Box 3: Microsoft Online Services Directory Synchronization Tool
Note: *From Scenario: / Use Active Directory Federation Services (AD FS) 2.0 to authenticate Contoso employees, partners, and customers. / Automate the sign-in experience by using the local AD FS 2.0 servers for AD FS single sign-on (SSO). *Implementing SSO for Office 365 is indicative of setting up ADFS 2.0 By default (the only supported DirSync scenario), passwords are not synced to Office 365 by Directory Sync. ADFS is required in order to use on-premises passwords for Office 365. *Directory synchronization is the synchronization of directory objects (users, groups, and contacts) from your on-premises Active Directory environment to the Office 365 directory infrastructure. The Microsoft Online Services Directory Synchronization tool is used to perform this synchronization. Reference: Active Directory Synchronization in Office 365
