Free update is available within one ywnloading [Latest PCDRA Exam Online](#) Products Q1: I have bought the products but where to download it?

NEW QUESTION: 1Which two cable specifications can support 1-gbps Ethernet ? choose two
A. RG-6
B. Category 5e
C. Category 3
D. Category 6
E. RG-11
Answer: B,D

NEW QUESTION: 2Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.You have a database that contains the following tables:
BlogCategory, BlogEntry, ProductReview, Product, and SalesPerson. The tables were created

using the following Transact SQL statements: You must modify the ProductReview Table to meet the following requirements: * The table must reference the ProductID column in the Product table * Existing records in the ProductReview table must not be validated with the Product table. * Deleting records in the Product table must not be allowed if records are referenced by the ProductReview table. * Changes to records in the Product table must propagate to the ProductReview table. You also have the following database tables: Order, ProductTypes, and SalesHistory, The transact-SQL statements for these tables are not available. You must modify the Orders table to meet the following requirements: * Create new rows in the table without granting INSERT permissions to the table. * Notify the sales person who places an order whether or not the order was completed. You must add the following constraints to the SalesHistory table: * a constraint on the SaleID column that allows the field to be used as a record identifier * a constraint that uses the ProductID column to reference the Product column of the ProductTypes table * a constraint on the CategoryID column that allows one row with a null value in the column * a constraint that limits the SalePrice column to values greater than four Finance department users must be able to retrieve data from the SalesHistory table for sales persons where the value of the SalesYTD column is above a certain threshold. You plan to create a memory-optimized table named SalesOrder. The table must meet the following requirements: * The table must hold 10 million unique sales orders. * The table must use checkpoints to minimize I/O operations and must not use transaction logging. * Data loss is acceptable. Performance for queries against the SalesOrder table that use Where clauses with exact equality operations must be optimized. You need to create the Sales Order table How should you complete the table definition? To answer? select the appropriate Transact-SQL segments in the answer area. **Answer:** Explanation: ExplanationBox 1: NONCLUSTERED HASHWITH (BUCKET_COUNT = 10000000) Hash index is preferable over a nonclustered index when queries test the indexed columns by use of a WHERE clause with an exact equality on all index key columns. We should use a bucket count of 10 million. Box 2: SCHEMA_ONLY Durability: The value of SCHEMA_AND_DATA indicates that the table is durable, meaning that changes are persisted on disk and survive restart or failover. SCHEMA_AND_DATA is the default value. The value of SCHEMA_ONLY indicates that the table is non-durable. The table schema is persisted but any data updates are not persisted upon a restart or failover of the database. DURABILITY=SCHEMA_ONLY is only allowed with MEMORY_OPTIMIZED=ON. References: <https://msdn.microsoft.com/en-us/library/mt670614.aspx>

NEW QUESTION: 3 A security engineer on a large enterprise network needs to schedule maintenance within a fixed window of time. A total outage period of four hours is permitted for servers. Workstations can undergo maintenance from 8:00 pm to 6:00 am daily. Which of the following can specify parameters for the maintenance work? (Select TWO). **A.** Quality of service **B.** Managed security service **C.** Operating level agreement **D.** Memorandum of understanding **E.** Network service provider **Answer: C, D** Explanation: **B:** A memorandum of understanding (MOU) documents conditions and applied terms for outsourcing partner organizations that must share data and information resources. It must be signed by a representative from each organization that has the legal authority to sign and are typically secured, as they are considered confidential. **E:** An operating level agreement (OLA) defines the responsibilities of each partner's internal support group and what group and resources are used to meet the specified goal. It is used in conjunction with service level agreements (SLAs).
