NEW QUESTION: 2How do HP Intelligent Power Distribution Units (iPDUs) help server integrators?**A.** They track power consumption with high accuracy and toward the data to HP OneView, where integrators can view it.**B.** They dynamically distribute power to different servers in the rack based on policies defined by integrators.**C.** They provide backup power for servers, helping to prevent costly network outages and unplanned downtime.**D.** They integrate power with cooling components, based on American Society of Heating, Refrigeration and Air-Conditioning Engineers (ASHRAE) standards.**Answer: A**Explanation:Explanation/Reference: Explanation:HP OneView collects and reports processor utilization and power and temperature history for your data center hardware. The appliance monitors power, automatically detects and reports power delivery errors, and provides precise power requirement information for HP ProLiant Gen8 servers and HP BladeSystem enclosures that you can use for planning rack and

power usage. Power Discovery Services enable automatic discovery and visualization of the power delivery topology for your data center. HP iPDUs enable the appliance to map the rack power topology automatically. The appliance detects wiring errors-such as lack of redundancy-and updates electrical inventory automatically when new servers are installed. The appliance also supports per-outlet power control for remote power cycling of each iPDU outlet. References:
