Firstly, PDF Version of CGEIT valid dumps questions is convenience for you to read, print and take notes.

NEW QUESTION: 1A. User Account Admin**B.** Service Support Admin**C.** Help Desk Admin**D.** Billing Admin**Answer: B**

NEW QUESTION: 2Several Security Policies can be used for different installation targets. The firewall protecting Human Resources' servers should have a unique Policy Package. These rules may only be installed on this machine and not accidentally on the Internet firewall. How can this be configured?**A.** A Rule Base can always be installed on any Check Point firewall object It is necessary to select the appropriate target directly after selecting Policy > Install.**B.** In the SmartDashboard main menu go to Policy / Policy Installation / Targets and select the correct firewall to be put into the list via Specific Targets.**C.** A Rule Base is always installed on all possible targets. The rules to be installed on a firewall are defined by the selection in the row Install On of the Rule Base.**D.** When selecting the correct firewall in each line of the row Install On of the Rule Base, only this firewall is shown in the list of possible installation targets after selecting Policy > Install.**Answer: B**

NEW QUESTION: 3You have 10 standalone servers that run Windows Server 2008 R2.You install the Windows Server Update Services (WSUS) server role on a server named Server1.You need to configure all of the servers to receive updates from Server1.What should you do?**A.** Run the wuauclt.exe /detectnow command on each server.**B.** Run the wuauclt.exe /reauthorization command on each server.**C.** Configure the Windows Update settings on each server by using a local group policy.**D.** Configure the Windows Update settings on each server by using the Control Panel.**Answer: C****Explanation:**For all servers to be configured to point at Server1, we need to use Group Policy.Configuring Windows Update settings on each server would not let us specify which server the computer uses. This is only done via the registry, which we can use Group Policy to control for all servers and simplify our job :)wuauclt.exe /detectnowThis would force each server to look for new updates at the time the command was executed.wuauclt.exe /reauthorizationThis would re-register the servers with the WSUS server (Server1), but does not inform them to get their updates from Server1.
