Before you purchase the system, C_SACP_2308 practice test provides you with a free trial service, so that customers can fully understand our system before buying;

2024 C_SACP_2308: Reliable SAP Certified Application Associate - SAP Analytics Cloud: Planning Valid Test Fee

All C_SACP_2308 guide exam can cater to each type of exam candidates' preferences, So you

could understand the quality of our C_SACP_2308 study materials, This SAP Certified Application Associate - SAP Analytics Cloud: Planning Exam demo product will help you to get acquainted with software interface and usability of C_SACP_2308 practice exam.

This format of interactive exams is a popular and proven way to learn, so you can memorize things better, and benefit from real exam questions, The C_SACP_2308 practice test content is very easy and simple to understand.

Our C_SACP_2308 study torrent is made by the efforts of all the experts with days and nights research and verification, So far, our C_SACP_2308 exam training torrent gradually wins a place in the study materials providing.

If you haven't passed the SAP Certified Application Associate - SAP Analytics Cloud: Planning prep training, you can get full refund without any reasons or switch other versions freely, Best C_SACP_2308 study torrent, If you are concerned that online services are relatively indifferent, the staff at C_SACP_2308 practice quiz will definitely change your mind.

We believe our C_SACP_2308 exam guide will help you pass exam easily without too much spirit & time, You can download free practice test VCE directly, Working with the Photoexperienceacademy Exam [SC-200 Valid Exam Cram](#) Engine is just like taking the actual tests, except we also give you the correct answers.

NEW QUESTION: 1HOTSPOTYou need to design the contractor information app.What should you recommend? To answer, select the appropriate options in the answer area.**Answer:** Explanation:Explanation:/ They also plan to extend their on-premises Active Directory into Azure for mobile app authentication/ VanArsdel mobile app must authenticate employees to the company's Active Directory.References: http://azure.microsoft.com/en-gb/documentation/articles/mobile-services-ios-get-started-offline-data/==Topic 2, Trey Research BackgroundOverviewTrey Research conducts agricultural research and sells the results to the agriculture and food industries. The company uses a combination of on-premises and third-party server clusters to meet its storage needs. Trey Research has seasonal demands on its services, with up to 50 percent drops in data capacity and bandwidth demand during low-demand periods. They plan to host their websites in an agile, cloud environment where the company can deploy and remove its websites based on its business requirements rather than the requirements of the hosting company.A recent fire near the datacenter that Trey Research uses raises the management team's awareness of the vulnerability of hosting all of the company's websites and data at any single location. The management team is concerned about protecting its data from loss as a result of a disaster.WebsitesTrey Research has a portfolio of 300 websites and associated background processes that are currently hosted in a third-party datacenter. All of the websites are written in ASP.NET, and the background processes use Windows Services. The hosting environment costsTrey Research approximately S25 million in hosting and maintenance fees.InfrastructureTrey Research also has on-premises servers that run VMs to support line-of-business applications. The company wants to migrate the line-of-business applications to the cloud, one application at a time. The company is migrating most of its production VMs from an aging VMWare ESXi farm to a Hyper-V cluster that runs on Windows Server 2012.ApplicationsDistributionTrackingTrey Research has a web application named Distributiontracking. This application constantly collects realtime data that tracks worldwide distribution points to customer retail sites. This data is available to customers at all times.The company wants to ensure that the distribution tracking data is stored at a location that is geographically close to the customers who will be using the information. The system must continue running in the event of VM failures without corrupting data. The system is processor intensive and should be run in a multithreading environment.HRAppThe company

has a human resources (HR) application named HRApp that stores data in an on-premises SQL Server database. The database must have at least two copies, but data to support backups and business continuity must stay in Trey Research locations only.The data must remain on-premises and cannot be stored in the cloud.HRApp was written by a third party, and the code cannot be modified. The human resources data is used by all business offices, and each office requires access to the entire database. Users report that HRApp takes all night to generate the required payroll reports, and they would like to reduce this time.MetricsTracking Trey Research has an application named MetricsTracking that is used to track analytics for the DistributionTracking web application. The data MetricsTracking collects is not customer-facing. Data is stored on an on-premises SQL Server database, but this data should be moved to the cloud. Employees at other locations access this data by using a remote desktop connection to connect to the application, but latency issues degrade the functionality.Trey Research wants a solution that allows remote employees to access metrics data without using a remote desktop connection. MetricsTracking was written in-house, and the development team is available to make modifications to the application if necessary.However, the company wants to continue to use SQL Server for MetricsTracking.Business RequirementsBusiness ContinuityYou have the following requirements:* Move all customer-facing data to the cloud.* Web servers should be backed up to geographically separate locations,* If one website becomes unavailable, customers should automatically be routed to websites that are still operational.* Data must be available regardless of the operational status of any particular website.* The HRApp system must remain on-premises and must be backed up.* The MetricsTracking data must be replicated so that it is locally available to allTrey Research offices.Auditing and SecurityYou have the following requirements:* Both internal and external consumers should be able to access research results.* Internal users should be able to access data by using their existing company credentials without requiring multiple logins.* Consumers should be able to access the service by using their Microsoft credentials.* Applications written to access the data must be authenticated.* Access and activity must be monitored and audited.* Ensure the security and integrity of the data collected from the worldwide distribution points for the distribution tracking application.Storage and ProcessingYou have the following requirements:* Provide real-time analysis of distribution tracking data by geographic location.* Collect and store large datasets in real-time data for customer use.* Locate the distribution tracking data as close to the central office as possible to improve bandwidth.* Co-locate the distribution tracking data as close to the customer as possible based on the customer's location.* Distribution tracking data must be stored in the JSON format and indexed by metadata that is stored in a SQL Server database.* Data in the cloud must be stored in geographically separate locations, but kept with the same political boundaries.Technical RequirementsMigrationYou have the following requirements:* Deploy all websites to Azure.* Replace on-premises and third-party physical server clusters with cloud-based solutions.* Optimize the speed for retrieving exiting JSON objects that contain the distribution tracking data.* Recommend strategies for partitioning data for load balancing.Auditing and SecurityYou have the following requirements:* Use Active Directory for internal and external authentication.* Use OAuth for application authentication. Business ContinuityYou have the following requirements:* Data must be backed up to separate geographic locations.* Web servers must run concurrent versions of all websites in distinct geographic locations.* Use Azure to back up the on-premises MetricsTracking data.* Use Azure virtual machines as a recovery platform for MetricsTracking andHRApp.* Ensure that there is at least one additional on-premises recovery environment for the HRApp.

NEW QUESTION: 2データベースはアーカイブログ・モードで実行されています。
ユーザーの表領域に属する10 TBのデータ・ファイルをバックアップする必要があります。
データファイルのバックアップが遅すぎます。
バックアップのパフォーマンスを向上させるには、どのような種類のバックアップをお勧めします
か？**A.** 表領域をオフラインにした後のコールド・バックアップ**B.** Recovery
Managerを使用したイメージ・コピー・バックアップ**C.**

表領域をバックアップ・モードにした後のコールド・バックアップ**D.**
RMANを使用した複数セクションの並列バックアップ**E.**
RMANを使用したマルチセクションイメージコピーのバックアップ**Answer: D**
