**NEW QUESTION: 1**Your network consists of one Active directory domain. The functional level of the domain is Windows Server 2008 R2. Your company has three departments named Sales, Marketing, and Engineering. All users in the domain are in an organizational unit (OU) named AllUsers.You have three custom applications. You deploy all custom applications by using a Group Policy object (GPO) named AppInstall.The Sales department purchases a new application that is only licensed for use by the Sales department.You need to recommend a solution to simplify the distribution of the new application.The solution must meet the following requirements:-The application must only be distributed to licensed users.-The amount of administrative effort required to manage the users must remain unaffected.-The three custom applications must be distributed to all existing and new users on the network. What should you recommend?**A.** Create a new child OU for each department. Link the AppInstall GPO to the Marketing OU and the Engineering OU. Create a new GPO. Link the new GPO to the Sales OU.**B.** Create a new group for each department and filter the AppInstall GPO to each group. Create a new GPO. Link the new GPO to the domain. Filter the new GPO to the Sales group.**C.** Create a new group for each department. Filter the AppInstall GPO to the Marketing group and the Engineering group. Create a new GPO. Link the new GPO to the domain. Filter the new GPO to the Sales group.**D.** Create a new child domain for each department and link the AppInstall GPO to each child domain. Create a new GPO. Link the new GPO to the Sales domain.**Answer: B**Explanation:To ensure that the other applications are distributed to all existing and new users on the network, you need to create a new group for each department and filter the InstallApp GPO to each group. Filtering allows you to target only specific computers or users. You can create and modify multiple preference items within each GPO, and you can filter each preference item to target only specific computers or users. Finally to simplify the distribution of the licensed application to the users of the sales department, you need to create and link a new GPO to the domain and filter the new GPO to the Sales group. You should not filter the InstallApp GPO to the Marketing group and the Development groups only because all the other applications beside the licensed application need to be installed to the Sales department also. Reference: Group Policy/ Preferences <http://technet2.microsoft.com/windowsserver2008/en/library/3b4568bc-9d3c-4477-807d2ea149ff06491033.msp?mfr=true>

**NEW QUESTION: 2** A company is storing a data on Amazon Simple Storage Service (S3). The company's security policy mandates that data is encrypted at rest. Which of the following methods can achieve this? Choose 3 answers  
**A.** Encrypt the data on the client-side before ingesting to Amazon S3 using their own master key  
**B.** Use Amazon S3 server-side encryption with EC2 key pair  
**C.** Use Amazon S3 bucket policies to restrict access to the data at rest  
**D.** Use SSL to encrypt the data while in transit to Amazon S3  
**E.** Use Amazon S3 server-side encryption with AWS key management service managed keys  
**F.** Use Amazon S3 server-side encryption with customer-provided keys  
**Answer: B,E,F**

**NEW QUESTION: 3** Which of the following are the common elements of platform as a service and software as a service? (Select two.)  
**A.** Both require the customer to maintain the hardware.  
**B.** Both provide granular access to the backend storage.  
**C.** Both implement hardware abstraction.  
**D.** Both take advantage of incremental scalability.  
**E.** Both allow the OS to be patched by the customer.  
**Answer: C,D**
