The HPE7-M02 prepare torrent can be based on the analysis of the annual questions, it is concluded that a series of important conclusions related to the qualification examination, combining with the relevant knowledge of recent years.

You can feel free to contact us if you have any questions about the HPE7-M02 passleader braindumps, So it is very necessary for you to try your best to get the HPE7-M02 certification in a short time.

Our Advanced HPE Storage Solutions Written Exam pdf vce has been making efforts to improve quality to offer an outstanding user experience, Besides, the HPE7-M02 learning materials is updated according to the exam centre, if [Latest PT0-003 Test Format](#) we have the updated version, our system will send the latest one to you for one year for free.

Our professional experts who did exhaustive work are diligently keeping eyes on accuracy and efficiency of HPE7-M02 practice materials for years, If you have any question about HPE7-M02 exam software or other exam materials, or any problem about how to purchase our products, you can contact our online customer service directly.

As the saying goes, knowledge has no limits.

NEW QUESTION: 1 Universal Container needs to integrate Salesforce with several home-grown systems. These systems require custom code to be written in order to integrate with them, and the CIO argues that if custom code needs to be written, then there is no reason to invest in middleware. Which three considerations should an Architect bring up to the CIO? Choose 3 answers. **A. Error Handling B. Orchestration C. Bulkification D. Logging E. Performance** **Answer: A,B,D**

NEW QUESTION: 2 Neither online nor offline software version upgrade of Huawei OceanStor 9000 affects device management. **A. FALSE B. TRUE** **Answer: A**

NEW QUESTION: 3 **A. Option D B. Option A C. Option C D. Option B** **Answer: C** **Explanation:** Explanation You can use the `container_commands` key to execute commands that affect your application source code. Container commands run after the application and web server have been set up and the application version archive has been extracted, but before the application version is deployed. Non-container commands and other customization operations are performed prior to the application source code being extracted. You can use `leader_only` to only run the command on a single instance, or configure a test to only run the command when a test command evaluates to true. Leader-only container commands are only executed during environment creation and deployments, while other commands and server customization operations are performed every time an instance is provisioned or updated. Leader-only container commands are not executed due to launch configuration changes, such as a change in the AMI Id or instance type. For more information on customizing containers, please visit the below URL:*

<http://docs.aws.amazon.com/elasticbeanstalk/latest/dg/customize-containers-ec2.html>

NEW QUESTION: 4 Testlet: Woodgrove Bank You need to recommend a monitoring solution for the file servers in the main office. The solution must meet the company's technical requirements. What should you include in the recommendation?

Case Study Title (Case Study): COMPANY OVERVIEW Overview Woodgrove Bank is an international financial organization.

Physical Location The company has a main office and multiple branch offices.

EXISTING ENVIRONMENT Active Directory Environment The network contains one Active Directory forest. A separate domain exists for each office.

Network Infrastructure All offices have domain controllers that are configured as DNS servers. All client computers are configured to connect to the DNS servers in their respective office only. The main office has the following servers and client computers: One Windows Server Update Services (WSUS) server. Client computers that run either Windows XP Service Pack 3 (SP3) or Windows 7. Ten file servers host multiple shared folders. The file servers run either Windows Server 2003 or Windows Server 2008 R2. One domain-based Distributed File System (DFS) namespace that has two replicas. The DFS servers run Windows Server 2008 R2. The DFS namespace is configured to use Windows 2000 Server mode. Each branch office has a WAN link to the main office. The WAN links are highly saturated. Each office has a dedicated high-speed Internet connection. All of the client computers in the branch offices run Windows 7.

User Problems Users report that it is difficult to find the shared folders on the network.

REQUIREMENTS Planned Changes Woodgrove Bank plans to implement the following changes: Deploy a new application named App1 on each client computer. App1 has a Windows Installer package and is compatible with Windows XP, Windows Vista, and Windows 7. Designate a user in each office to manage the address information of the user accounts in that office. Deploy a new branch office named Branch22 that has the following servers: One file server named Server1 & Two domain controllers named DC10 and DC11 that are configured as DNS servers.

Technical Requirements Woodgrove Bank must meet the following technical requirements: Minimize hardware and software costs, whenever possible. Encrypt all DNS replication traffic between the DNS servers. Ensure that users in the branch offices can access the DFS targets if a WAN link fails. Ensure that users can only view the list of DFS targets to which they are assigned permissions. Minimize the amount of network traffic between the main office and the branch offices, whenever possible. Minimize the amount of name resolution traffic from the branch offices to the DNS servers in the main office. Ensure that the administrators in the main office manage all Windows update approvals and all computer groups. Manage all of the share permissions and the folder permissions for the file servers from a single management console. Ensure that if a file on a file server is deleted accidentally, users can revert to a previous version of the file without administrator intervention. Ensure that administrators are notified by e-mail each time a user successfully copies a file that has an .avi extension to one of the file servers.

Security Requirements Woodgrove Bank must meet the following security requirements: Access rights and user rights must be minimized. The Guest account must be disabled on all servers. Internet Information Services (IIS) must only be installed on authorized servers.

A. Performance Monitor logs **B.** File Server Resource Manager (FSRM) active file screens **C.** File Server Resource Manager (FSRM) passive file screens **D.** Performance Monitor alerts

Answer: C Explanation: Explanation/Reference: To fulfill the technical requirement (Ensure that administrators are notified by e-mail each time a user successfully copies a file that has an .avi extension to one of the file servers), FSRM passive file screen should be used.
