NEW QUESTION: 1Your company has an Active Directory domain. You are planning the deployment of Windows 7 to client computers that are located in a main office and in satellite offices. All client computers use the same hardware. Your company's security policy has the following requirements: All client computers in the main office must run Windows 7 Enterprise. All client computers in the satellite offices must use BitLocker. All client computers in the main office must apply a custom security template. The template must not apply to client computers in the satellite offices. You need to recommend an image-creation strategy that meets the requirements of the security policy. The solution must minimize administrative effort. What should you include in your recommendations?
A. One image for the main office computers and one image for the satellite office computers. A Group Policy object
B. One image for all client computers and a Group Policy object.
C. One image for all client computers and a Data Recovery Agent. A Security database (secedit.sdb).
D. One image for the main office computers and one image for the satellite office computers. A Data Recovery Agent and a Security database (secedit.sdb)
Answer: B
