NEW QUESTION: 1 Country Y uses its scarce foreign-exchange reserves to buy scrap iron for recycling into steel. Although the steel thus produced earns more foreign exchange than it costs, that policy is foolish. Country Y's own territory has vast deposits of iron ore, which can be mined with minimal expenditure of foreign exchange.Which of the following, if true, provides the strongest support for Country Y's policy of buying scrap iron abroad?**A.** There is virtually no difference in quality between steel produced from scrap iron and that produced from iron ore.
B. Country Y's foreign-exchange reserves dropped significantly in 1987.**C.** The price of scrap iron on international markets rose significantly in 1987.**D.** Furnaces that process scrap iron can be built and operated in Country Y with substantially less foreign exchange than can furnaces that process iron ore.**E.** Scrap iron is now used in the production of roughly half the steel used in the world today, and experts predict that scrap iron will be used even more extensively in the future.**Answer: D**Explanation:Explanation/Reference:Explanation:

NEW QUESTION: 2 To set up the intercompany transaction using the Chart of Account rule, you will have to _____.**A.** specify the chart of account intercompany receivables and intercompany payables accounts**B.** specify the chart of account intercompany receivables only **C.** specify the Chart of account intercompany receivables accounts, intercompany payables account the source and the category**D.** specify the chart of accounts intercompany payables only**Answer: A**Explanation:Defining intercompany Receivables and Payables accounts is required before using the intercompany feature.Note:*You must define Intracompany balancing rules if you want to balance journals automatically. You may define as many or as few balancing rules as you choose, and each balancing rule may have one or many accounting rules.*Intracompany balancing allows you to define rules according to the business needs of your company. When there are many balancing rules defined, the Balancing API uses an evaluation order to pick the appropriate rule. Once the balancing rule is selected, there may also be several accounting rules that must be evaluated on the balancing rule. The Balancing API uses the same order for evaluating accounting rules, and understanding this evaluation order will help you define your balancing rules and accounting rules.Reference: Oracle Financials Implementation Guide, Intercompany and Intracompany Balancing
