Then you can download HPE6-A85 Aruba Campus Access Associate Exam exam prep dumps and start your study immediately, So after carefully calculating about the costs and benefits, our HP HPE6-A85 latest practice questions should be the best choice for every candidate.

**NEW QUESTION: 1** DRAG DROP You are using Microsoft PPM. Your organization provides temporary staff to its customers. Temporary staff members are organized into junior level, standard level, and senior level. Each level is further categorized by two rates. The regular rate is for work within 100 kilometers and a higher rate is for work beyond that distance. You must include all temporary staff and all rates in your schedule. You need to ensure that Project calculates total resource cost immediately when making a resource assignment. You want the ability to switch between the regular rate and the higher rate for each task. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. **Answer:** Explanation:

**NEW QUESTION: 2** You are developing the data platform for a global retail company. The company operates during normal working hours in each region. The analytical database is used once a week for building sales projections. Each region maintains its own private virtual network. Building the sales projections is very resource intensive and generates upwards of 20 terabytes (TB) of data. Microsoft Azure SQL Databases must be provisioned. \* Database provisioning must maximize performance and minimize cost \* The daily sales for each region must be stored in an Azure SQL Database instance \* Once a day, the data for all regions must be loaded in an analytical Azure SQL Database instance You need to provision Azure SQL database instances. How should you provision the database instances? To answer, drag the appropriate

Azure SQL products to the correct databases. Each Azure SQL product may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation Box 1: Azure SQL Database elastic pools SQL Database elastic pools are a simple, cost-effective solution for managing and scaling multiple databases that have varying and unpredictable usage demands. The databases in an elastic pool are on a single Azure SQL Database server and share a set number of resources at a set price. Elastic pools in Azure SQL Database enable SaaS developers to optimize the price performance for a group of databases within a prescribed budget while delivering performance elasticity for each database. Box 2: Azure SQL Database Hyperscale A Hyperscale database is an Azure SQL database in the Hyperscale service tier that is backed by the Hyperscale scale-out storage technology. A Hyperscale database supports up to 100 TB of data and provides high throughput and performance, as well as rapid scaling to adapt to the workload requirements. Scaling is transparent to the application - connectivity, query processing, and so on, work like any other SQL database.

**NEW QUESTION: 3** Which of the following statements about partitioning algorithms is correct?  
**A.** SAME partitioning method is the fastest algorithm because it does not require additional processing  
**B.** The grouping methods available in the Aggregator stage are MODULUS and HASH  
**C.** For the Lookup reference stage, DataStage always uses the MODULUS method  
**D.** MODULUS and HASH ensure balanced data volumes in all the partitions  
**Answer: A**
