NEW QUESTION: 1

マスターポリシーで構成できるのは次のうちどれですか？該当するものをすべて選択してください

A. パスワードの調整 **B.** 排他的パスワード **C.** チケットの統合 **D.** パスワードエージングルール

<https://docs.cyberark.com/Product-Doc/OnlineHelp/PAS/11.4/en/Content/PASIMP/Working-with-Master-Policy-Rules.htm> **E.** デュアルコントロール **F.** ワンタイムパスワード **G.**

カスタム接続コンポーネント **H.** 必要なプロパティ **Answer: B,D,E,F**

NEW QUESTION: 2 You are an implementation consultant working at a company where project schedules have been managed primarily with Microsoft Project, on individual desktops. The "projects" theoretically have been multiple-year projects. Your scope of work includes migrating project data from legacy project plans and setting up project planning standards. As you look into the current Microsoft Project plans, it becomes clear that the projects are not really multi-year projects. The plans have been managed by creating "new" projects within the old projects by skipping a few lines in what has become more of a program history. What approach would you recommend to retain the legacy data (which is a mandated requirement in the new Primavera system), while moving forward with a "one project, one plan" process? **A.** Retire legacy project plans and start with new project planning standards. **B.** Import all MS Project plans directly into the P6 production database "as is." **C.** Create new projects only for in flight work identified in MS Project plans. **D.** Import MS Project plans but break out current in-flight work into separate projects. **Answer: D**

NEW QUESTION: 3 An LTM Specialist needs to deploy a virtual server that will load balance traffic targeting <https://register.example.com> to a set of three web servers. Persistence needs to be ensured. No persistence mirroring is allowed SSL offloading is required. A fourth web server

with fewer resources will be used to handle requests from engine bots to https://register.example.com/vrobots.txt by an iRule. The (Rule will use the HTTP_REQUEST event. What are the required profile and persistence settings to implement this?

A. tcp, clientssl, http, source address persistence
B. tcp, clientssl, http, cookie persistence
C. tcp, clientssl, http, serverssl cookie persistence
D. tcp, clientssl, serverssl, ssl persistence

Answer: B

Explanation: The option is wrong, it should be clientssl and serverssl. If the title requires ssl offload instead of encryption, you need clientssl instead of serverssl. iRule needs HTTP profile to enable HTTP_REQUEST. If the session cannot be mirrored, the cookie session remains to meet the demand.

NEW QUESTION: 4 Which of the following steps prevents a user from obtaining an interactive login session?

A. Run the command `chsh -s /bin/false` with the user name.
B. Remove the user from the group `staff`.
C. Create a `.nologin` file in the user's home directory.
D. Set the UID for the user to 0.
E. Add the user to `/etc/noaccess`.

Answer: A
