**NEW QUESTION: 1**Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.Your network contains an Active Directory forest.You deploy Microsoft 365.You plan to implement directory synchronization.You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.Users passwords must be 10 characters or more.Solution: Implement password hash synchronization and modify the password settings from the Default Domain Policy in Active Directory.Does this meet the goal?**A. No**This solution meets the requirements:Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable. (this is because the authentication is performed by Azure Active Directory).Users passwords must be 10 characters or more. (the Default Domain Policy in the on-premise Active Directory can be configured to require the password length)**B. Yes****Answer: B**Explanation:Reference:

**NEW QUESTION: 2** You work as a Data Helpdesk Technician for Bluewells Inc. The company has a Windows-based network. You use Microsoft Outlook as the default mail client for accessing e-mails. You have given your e-mail address on the Web for receiving information on new technologies. You start receiving unwanted e-mail from various websites after registering. Which of the following terms refer to such types of unwanted e-mail? Each correct answer represents a complete solution. Choose all that apply. **A. Junk e-mail B. Botnet C. Zombie D. Spam**  
**Answer: A, D**  
**Explanation:** Junk e-mail is unsolicited e-mail. These types of e-mail always want to sell something. Junk e-mail is often sent as a single e-mail message broadcast to hundreds of unknowing recipients. One cannot write back to the sender of junk e-mails, as it is usually anonymous. Junk e-mails provide an easy way to small companies and scammers to drum up some business. Spam is a term that refers to the unsolicited e-mails sent to a large number of e-mail users. The number of such e-mails is increasing day by day, as most companies now prefer to use e-mails for promoting their products. Because of these unsolicited e-mails, legitimate e-mails take a much longer time to deliver to their destination. The attachments sent through spam may also contain viruses. However, spam can be stopped by implementing spam filters on servers and e-mail clients. Answer option B is incorrect. A zombie is malicious software that secretly takes over another computer connected to the Internet. The zombie's creator uses the same computer to launch attacks that are difficult to detect. Zombies are used in denial-of-service attacks. The attacker plants a zombie in hundreds of computers belonging to unsuspecting third parties, and then uses these computers against targeted websites. These computers are also called zombie computers. Zombies are also used to commit click fraud against sites displaying pay per click advertising. Others can host phishing or money mule recruiting websites. Answer option A is incorrect. Botnet is a type of malware that allows an attacker to take control over an infected computer. It is also known as Web robots. Botnets are usually part of a network of infected machines, which is typically made up of victim machines that stretch across the Globe. Some botnets have a few hundred or thousand computers, but others have tens and even hundreds of thousands of computers at their disposal. Many of these computers are infected without the knowledge of their owner.

**NEW QUESTION: 3** View the exhibit. Refer to the exhibit. What type of network communication is depicted? **A. IEEE 802.3 with SNAP frame B. IEEE 802.3 with LLC frame C. Ethernet II frame D. TCP packet**
