So the knowledge you have learnt are totally accords with the official **NCP-DB New Dumps Questions** requirement, Or you can request to free change other version, I can guarantee that our study materials will be your best choice.

The person who win the match or succeed **NCP-DB New Dumps Questions** in walking through the bridge will be a true powerhouse.

NEW QUESTION: 1Your customer wants line managers to be able to access the active workforce compensation plan during the first three months of the Plan period, but not to update it. The evaluation period start and end dates for the plan are January 1 to December 31 of the year.How should you set this up? (Choose the best answer.)**A.** Configure Plan access start and end dates from January 1 to March 31 of the year and Worksheet update period start and end dates from April 1 to December 31 of the year.**B.** Configure Worksheet update period start and end dates from January 1 to December 31 of the year.**C.** Configure Plan access start and end dates from January 1 to December 31 of the year.**D.** Configure Worksheet update period start and end dates from January 1 to March 31 of the year and Plan access start and end dates from April 1 to December 31 of the year.**Answer: A**

NEW QUESTION: 2When a call is in the task flow, the system is constantly checking all elements of the task flow.If there is a part of the task flow you do not want included in the task flow after the call has passed through it, which element could you use to control this?**A.** End Call Element**B.** Task Trap**C.** New Task Element**D.** Source Element**Answer: D**

NEW QUESTION: 3Case Study 7Policy serviceYou develop and deploy a stateful ASP.NET Core 2.1 web application named Policy service to an Azure App Service Web App. The application reacts to events from Azure Event Grid and performs policy actions based on those events.The application must include the Event Grid Event ID field in all Application Insights telemetry. Policy service must use Application Insights to automatically scale with the number of policy actions that it is performing.OtherAnomaly detection serviceYou have an anomaly detection service that analyzes log information for anomalies. It is implemented as an Azure Machine Learning model. The model is deployed as a web service.If an anomaly is detected, an Azure Function that emails administrators is called by using an HTTP WebHook.Health monitoringAll web applications and services have health monitoring at the /health service endpoint.Issues Policy lossWhen you deploy Policy service, policies may not be applied if they were in the process of being applied during the deployment.Performance issueWhen under heavy load, the anomaly detection service undergoes slowdowns and rejects connections.Notification latency Users report that anomaly detection emails can sometimes arrive several minutes after an anomaly is detected.PoliciesLog policyAll Azure App Service Web Apps must write logs to Azure Blob storage. All log files should be saved to a container named logdrop. Logs must remain in the container for 15 days.Authentication eventsAuthentication events are used to monitor users signing in and signing out. All authentication events must be processed by Policy service. Sign outs must be processed as quickly as possible.PolicyLibYou have a shared library named PolicyLib that contains functionality common to all ASP.NET Core web services and

applications. The PolicyLib library must: * Exclude non-user actions from Application Insights telemetry. * Provide methods that allow a web service to scale itself. * Ensure that scaling actions do not disrupt application usage. Relevant portions of the app files are shown below. Line numbers are included for reference only and include a two-character prefix that denotes the specific file to which they belong. Relevant portions of the app files are shown below. Line numbers are included for reference only and include a two-character prefix that denotes the specific file to which they belong. Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You need to ensure that authentication events are triggered and processed according to the policy. Solution: Ensure that signout events have a subject prefix. Create an Azure Event Grid subscription that uses the subjectBeginsWith filter. Does the solution meet the goal? **A. No** **B. Yes**
Answer: B
Explanation: Scenario: Authentication events are used to monitor users signing in and signing out. All authentication events must be processed by Policy service. Sign outs must be processed as quickly as possible. References:
<https://docs.microsoft.com/en-us/azure/event-grid/subscription-creation-schema>
