The most efficient our PEGACPSA88V1 study materials just want to help you pass the exam more smoothly, Now, let us take a succinct look of features of PEGACPSA88V1 exam questions as follow: Professional PEGACPSA88V1 study materials.

NEW QUESTION: 1Which of the following threat types can occur when an application does not properly validate input and can be leveraged to send users to malicious sites that appear to be legitimate?**A.** Insecure direct object references**B.** Security misconfiguration**C.** Sensitive data exposure**D.** Unvalidated redirects and forwards**Answer: D****Explanation:**Explanation/Reference: Explanation:Many web applications offer redirect or forward pages that send users to different, external sites. If these pages are not properly secured and validated, attackers can use the application to forward users off to sites for phishing or malware attempts. These attempts can often be more successful than direct phishing attempts because users will trust the site or application that sent them there, and they will assume it has been properly validated and approved by the trusted application's owners or operators. Security misconfiguration occurs when applications and systems are not properly configured for security--often a result of misapplied or inadequate baselines. Insecure direct object references occur when code references aspects of the infrastructure, especially internal or private systems, and an attacker can use that knowledge to glean more information about the infrastructure. Sensitive data exposure occurs when an application does not use sufficient encryption and other security controls to protect sensitive application data.

NEW QUESTION: 2You perform a settlement with a primary cost account which is different from the cost account you used to post the originalexpense. Which object is a valid receiver for the settlement?**A.** WBS element**B.** Fixed Asset**C.** Cost center**D.** Internal order**Answer: B**

NEW QUESTION: 3Full synchronization between cluster members is handled by Firewall Kernel. Which port is used for this?**A.** UDP port 256**B.** UDP port 265**C.** TCP port 256**D.** TCP port 265**Answer: C****Explanation:**Synchronization works in two modes:
