NEW QUESTION: 2 You use a dataset in BigQuery for analysis. You want to provide third-party companies with access to the same dataset. You need to keep the costs of data sharing low and ensure that the data is current. Which solution should you choose? **A.** Use Cloud Scheduler to export the data on a regular basis to Cloud Storage, and provide third-party companies with access to the bucket. **B.** Create a separate dataset in BigQuery that contains the relevant data to share, and provide third-party companies with access to the new dataset. **C.** Create a Cloud Dataflow job that reads the data in frequent time intervals, and writes it to the relevant BigQuery dataset or Cloud Storage bucket for third-party companies to use. **D.** Create an authorized view on the BigQuery table to control data access, and provide third-party companies with access to that view. **Answer: D** Explanation: By creating an authorized view one assures that the data is current and avoids taking more storage space (and cost) in order to

share a dataset. B and D are not cost optimal and C does not guarantee that the data is kept updated.
