NEW QUESTION: 1You are managing a project based on a Waterfall model. You define a project and a project plan in Oracle Project Portfolio Management with tasks and subtasks applicable to each of the phases of the project: Initiation, Discovery, Design, Build, Test, and Deploy. As a project manager, you want to define deliverables for your project requirements that are elucidated during the Discovery phase of your project. You now want to understand how the inheritance between requirements, tasks, and deliverables works. Identify the two correct statements in this respect. (Choose two.)**A.** The association of a deliverable with a task is dependent on associating a requirement with a task.**B.** A deliverable associated with a requirement is automatically associated with the tasks created for that requirement.**C.** You associate a deliverable with a task independent of associating a requirement with a task.**D.** A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement.**Answer: A,C**

NEW QUESTION: 2You administer a single server that contains a Microsoft SQL Server 2016 default instance. You plan to install a new application that requires the deployment of a database on the server. The application login requires sysadmin permissions. You need to ensure that the application login is unable to access other production databases. What should you do?**A.** Install a new default SQL Server instance on the server.**B.** Use the SQL Server default instance and configure an affinity mask.**C.** Use the SQL Server default instance and enable Contained Databases.**D.** Install a new named SQL Server instance on the server.**Answer: D**
Explanation:Explanation/Reference:Explanation:SQL Server supports multiple instances of SQL Server on a single server or processor, but only one instance can be the default instance. All others must be named instances. A computer can run multiple instances of SQL Server concurrently, and each instance runs independently of other instances.
