CTS latest download demo is available for all of you, Serves as a leader in this industry, our company provides the best service and high-quality CTS Dumps collection which can help our candidates pass the exam quickly.

**NEW QUESTION: 1** Examine the data in the ename and hiredate columns of the employees table: You want to generate a list of user IDs as follows: You issue the following query: What is the outcome? **A.** It executes successfully and gives the correct output. **B.** It executes successfully but does not give the correct output. **C.** It generates an error because the REPLACE function is not valid. **D.** It generates an error because the SUBSTR function cannot be nested in the CONCAT function. **Answer: A** Explanation: REPLACE (text, search\_string, replacement\_string) Searches a text expression for a character string and, if found, replaces it with a specified replacement string The REPLACE Function The REPLACE function replaces all occurrences of a search item in a source string with a replacement term and returns the modified source string. If the length of the replacement term is different from that of the search item, then the lengths of the returned and source strings will be different. If the search string is not found, the source string is returned unchanged. Numeric and date literals and expressions are evaluated before being implicitly cast as characters when they occur as parameters to the REPLACE function. The REPLACE function takes three parameters, with the first two being mandatory. Its syntax is REPLACE (source string, search item, [replacement term]). If the replacement term parameter is omitted, each occurrence of the search item is removed from the source string. In other words, the search item is replaced by an empty string. . The following queries illustrate the REPLACE function with numeric and date expressions: Query 1: select replace(10000-3, '9', '85') from dual Query 2: select replace(sysdate, 'DEC', 'NOV') from dual

**NEW QUESTION: 2** Given the XML Document below: `<nds dtdversion="3.5" ndsversion="8.x">  
<source><product version="3.5.10.20070918 ">DirXML</product><contact>Novell,  
Inc.</contact></source><input><add class-name="User"  
qualified-src-dn="O=DAOU=USERSCN=E123456" src-dn="DATREEDAUSERSE123456"  
src-entry-id="34042" from-merge="true"><add-attr attr-name="Facsimile Telephone  
Number"><value type="structured"><component  
name="faxNumber">801-555-1212</component><component  
name="faxBitCount">0</component><component name="faxParameters"/></value>  
</add-attr><add-attr attr-name="Full Name"><value type="string">Frank Jones</value>  
</add-attr><add-attr attr-name="Given Name"><value type="string">Frank</value>  
</add-attr><add-attr attr-name="Internet EMail Address"><value type="string">  
\[email&#160;protected\]</value></add-attr><add-attr attr-name="Surname"><value  
type="string">Jones</value></add-attr></add></input></nds>` Within the Policy Builder Rule

Conditions, what value will the XPATH Statement "@frommerge='true'" return?**A. success****B. true****C. false****D. error****E. null****Answer: B**

**NEW QUESTION: 3**You are asked to configure your system to save crash dump information. While choosing a directory to save the dump data, you consider protecting a minimum amount of free space. What is the default minimum free space in a crash dump directory?**A. By default, the space is determined by the amount of swap space.****B. By default, no minimum free space is set.****C.
