We guarantee that you will like not only our NSE7_PBC-7.2 exam cram but also excellent customer service.

NEW QUESTION: 1Your company is planning on developing an application in AWS. This is a web based application. The application user will use their facebook or google identities for authentication. You want to have the ability to manage user profiles without having to add extra coding to manage this. Which of the below would assist in this. Please select:**A.** Create a SAML provider in AWS**B.** Use IAM users to manage the user profiles**C.** Create an OIDC identity provider in AWS**D.** Use AWS Cognito to manage the user profiles**Answer: D****Explanation:** ExplanationThe AWS Documentation mentions the followingA user pool is a user directory in Amazon Cognito. With a user pool, your users can sign in to your web or mobile app through Amazon Cognito. Your users can also sign in through social identity providers like Facebook or Amazon, and through SAML identity providers. Whether your users sign in directly or through a third party, all members of the user pool have a directory profile that you can access through an SDK. User pools provide: Sign-up and sign-in services. A built-in, customizable web UI to sign in users. Social sign-in with Facebook, Google, and Login with Amazon, as well as sign-in with SAML identity providers from your user pool. User directory management and user profiles. Security features such as multi-factor authentication (MFA), checks for compromised credentials, account takeover protection, and phone and email verification. Customized workflows and user migration through AWS Lambda triggers. Options A and B are invalid because these are not used to manage users Option D is invalid because this would be a maintenance overhead For more information on Cognito User Identity pools, please refer to the below Link:

<https://docs.aws.amazon.com/cognito/latest/developerguide/cognito-user-identity-pools.html>
The correct answer is: Use AWS Cognito to manage the user profiles Submit your Feedback/Queries to our Experts

NEW QUESTION: 2An NSX administrator has created a segment named WEB-LS from the simplified UI and noticed the segment is not realized on the KVM Transport node. What are two possible causes for this issue? (Choose two.)**A.** The virtual machines running on the KVM Transport Node are not connected to the VDS.**B.** The virtual machines running on the KVM

transport node are not connected to the WEB-LS Segment.**C.** The virtual machines running on the KVM Transport Node are connected to the WEB-LS segment, but are in Powered Off state.**D.** The KVM Transport node has hardware issues and will not realize the WEB-LS Segment.**E.** Since the Compute Manager is disconnected in Simplified UI, the WEB-LS segment will not be realized on the KVM Transport Node.**Answer: C,E**

NEW QUESTION: 3When creating an entitlement, which three details are required? (Choose three.)**A.** Expiration Date**B.** Status**C.** Name**D.** Entitled Services**E.** Business Group**Answer: B,C,E**
