NEW QUESTION: 1 Multipathing software_____.**A.** cannot improve system performance**B.** is inherently built into all storage products**C.** is supported by ASM**D.** cannot improve system availability**Answer: C****Explanation:** Although ASM is not designed with multipathing functionality, ASM does operate with multipathing technologies. Multipathing technologies are available from many sources. Storage vendors offer multipathing products to support their specific storage products, while software vendors usually develop multipathing products to support several server platforms and storage.**Note:*** Multipathing solutions provide failover by using redundant physical path components. These components include adapters, cables, and switches that reside between the server and the storage subsystem. If one or more of these components fails, then applications can still access their data, eliminating a single point of failure with the Storage Area Network (SAN), Host Bus Adapter, interface cable, or host port on a multiported storage array.**Reference:** Oracle Database Storage Administrator's Guide, ASM and Multipathing

NEW QUESTION: 2 A customer is using Hitachi Universal Replicator and wants to reduce resynchronization time. Which strategy should be recommended to achieve this objective?**A.** Order devices in the HORCM file from lowest change rate to highest change rate.**B.** Order devices in the HORCM file from highest change rate to lowest change rate.**C.** Increase the priority in Storage Navigator.**D.** Increase the number of RAID groups used for journals.**Answer: A**

NEW QUESTION: 3 Your company has an Exchange Server 2016 organization. All users have a primary mailbox and archive mailboxes. You create a new retention policy for the users. The policy includes the following types of tags: A default retention policy tag (RPT) applied to the mailbox: The tag is configured to move email messages older than three years to the archive. An RPT applied to the users' Sent Items folder: The tag is configured to move email messages older than one year to the archive. The corporate retention policy is applied to all of the mailboxes. **A**

user creates a personal tag named Tag1. The personal tag is configured to delete items permanently after 180 days. The user sends an email message that uses Tag1. You need to identify what will occur to the message. What should you identify? **A.** The message will be deleted in six months. **B.** The message will be moved to the archive in one year. **C.** The message will be moved to the archive in one year and deleted six months later. **D.** The message will be moved to the archive in three years. **Answer: A**
Explanation: Personal tags allow your users to determine how long an item should be retained. For example, the mailbox can have a DPT to delete items in seven years, but a user can create an exception for items such as newsletters and automated notifications by applying a personal tag to delete them in three days.
