**NEW QUESTION: 2**You plan to create apps for a company.You need to identify the Power Platform tools required.What should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.NOTE: Each correct selection is worth one point.**Answer:** Explanation:Explanation:Box 1: Canvas AppBox 2: Model-driven app Model-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.Box 3: Power AutomatePower Automate is a service that helps you create automated workflows between your favorite apps and services to synchronize files, get notifications, collect data, and more.Box 4: Power Virtual Agents botWhen you create bots with Power Virtual Agents, you author and edit Topics.Case Study:s are discrete conversation paths that, when used together within a single bot, allow for users to have a conversation with a bot that feels natural and flows appropriately.Creating a bot with Power Virtual Agents is easy to do with the no-code authoring canvas, and there are a number of ways you can manage how Topics interact, how you want the conversation to flow, and what it should feel like.Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/authoring-fundamentals> <https://docs.microsoft.com/en-us/power-automate>
