NEW QUESTION: 3Your network contains a server named Server1 that runs Windows Server 2012. App1 has the Print and Document Services server role installed. All client computers run Windows 8. The network contains a network-attached print device named Printer1. From App1, you share Printer1. You need to ensure that users who have connected to Printer1 previously can print to Printer1 if App1 fails.What should you configure?To answer, select the appropriate option in the answer area.**Answer:** Explanation:Explanation:Branch Office Direct Printing can reduce Wide Area Network (WAN) usage by printing directly to a print device instead of a server print queue. This feature can be enabled or disabled on a per printer basis and is transparent to the user. It is enabled by an administrator using the Print Management Console or Windows PowerShell on the server.The printer information is cached in the branch office, so that if the print server is unavailable for some reason (for example if the WAN link to the data center is down), then it is still possible for the user to print.Branch Office Direct Printing requires the following operating systems:Windows Server 2012Windows 8 <http://technet.microsoft.com/en-us/library/jj134156.aspx>
