**NEW QUESTION: 2**HOTSPOT**Answer:** Explanation:Topic 7, Contoso, LtdBackgroundContoso, Ltd. is developing a patient monitoring solution for a hospital. The solution consists of an Azure website and a set of mobile applications that health care providers use to monitor patients remotely.Monitoring devices that run the embedded version of Windows will be attached to patients. The devices will collect information from patients and will transmit real-time continuous data to a service that runs on Azure.The service collects and distributes data. The data that the service provides must be accessible by the website and by the mobile applications.Business RequirementsPatientsAll patient data must be stored securely on Azure. Data security must meet or exceed Health Insurance Portability and Accountability Act of 1996 (HIPAA) standards in the United States and must meet or exceed ISO/ICE 27002 data security standards in the rest of the world.ContractorsThird-party contractors will develop the mobile applications. All contractors must develop the applications by using virtual machines (VMs) that are hosted on Azure. Only authorized contractors and authorized IP addresses are permitted to access the VMs. The contractors can use Near Field Communication (NFC) tags to launch Remote Desktop (RD) connections to the VMs from NFC-enabled devices. For testing

purposes, contractors must be able to run multiple instances of mobile applications within the VMs.Data Collection and Distribution ServiceThe service must monitor the patient data and send out alerts to health care providers when specific conditions are detected. The service must send the alerts to mobile applications and to the website in real time so that doctors, nurses, and caregivers can attend to the patient. Partner organizations and diagnostic laboratories must be able to securely access the data and the website from remote locations. Current IssuesA partner that is testing a prototype of the website reports that after signing in to the website, the partner is redirected to the settings page instead of to the home page.The data from the patient devices is slow to appear on the website and does not always appear. All patient devices online have active connections to the data collection service.Technical RequirementsContractorsAll contractors will use virtual machines that are initially configured as size A3. Contractors must sign in to the assigned VM by using IP addresses from a list of preapproved addresses.Data Collection and Distribution ServiceAll deployed services must send an alert email to [email protected] when any of the following conditions is met: Website and Mobile DevicesThe website must be secure and must be accessible only within the hospital's physical grounds. All mobile applications and websites must be responsive. All websites must produce error logs that can be viewed remotely.Virtual MachinesApplication StructureRelevant portions of the application files are shown in the following code segments. Line numbers in the code segments are included for reference only and include a two-character prefix that denotes the specific file to which they belong.
