Photoexperienceacademy updated exam material is cherished to all valued [H13-323_V1.0 Practice Test Fee](#) users as it carries all the necessary details which you need to be certified, Latest training material, freely.

As a powerful tool for the workers to walk forward a higher self-improvement, our D-XTR-MN-A-24 test practice cram continues to pursue our passion for better performance and human-centric technology.

And our website is the most reliable one, Online and offline chat service are available, they possess the professional knowledge for D-XTR-MN-A-24 exam materials, and if you have any questions, you can consult us.

Even if you are not sure about the answer, you should submit **D-XTR-MN-A-24 Pdf Version** an answer as per your skills and knowledge, The Dell XtremIO Maintenance Achievement pdf demo questions can be downloaded for test and try.

The one badge of D-XTR-MN-A-24 certificate will increase your earnings and push you forward to achieve your career objectives.

NEW QUESTION: 1You are developing a form that captures a user's email address by using HTML5 and jQuery. The form must capture the form elements as a string. You need to implement this functionality. How should you develop the form? (To answer, drag the appropriate code segment to the correct target or targets in the answer area. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)**Answer:** Explanation: Explanation* The serialize() method creates a URL encoded text string by serializing form values. You can select one or more form elements (like input and/or text area), or the form element itself. The serialized values can be used in the URL query string when making an AJAX request. Example: \$("form").serialize();* decodeURIComponent The decodeURIComponent() function decodes a URI component. Return Value: A String, representing the decoded URI. Incorrect: Not decodeURI: decodeURI is intended for use on the full URI. decodeURIComponent is intended to be used on .. well .. URI components that is any part that lies between separators (; / ? : @ & = + \$, #). Reference: jQuery serialize() Method

NEW QUESTION: 2The GetExternalOrder() method in the ExternalQueueService service is throwing a runtime error. The method must query the database for a record that matches the orderNum parameter passed to the method. You need to modify the queryString string to retrieve the record. With which code segment should you replace line EQ64?**A.** Option **B.** Option **D.** Option **C.** Option **A.****Answer: C**

NEW QUESTION: 3In Huawei devices, when ISIS imports external routes and sets external route tags for routing information, ISIS's metric types do not need to be modified, keep the default.**A.** True**B.** False**Answer: B**

NEW QUESTION: 4Scenario 2 (Case Study): Background You are developing a Windows Store app named Picture Sharer. The app will allow users to capture, modify, caption, and share pictures. Application Structure The ShareImageButton and GetContactsButton controls use the same foreground color. The foreground color might change in the future. The following code defines a custom button style named ButtonStyleRed: Relevant portions of the app files are

shown. (Line numbers are included for reference only and include a two-character prefix that denotes the specific file to which they belong.)

Business RequirementsThe app must meet the following business requirements:-Allow users to capture and retrieve pictures, modify pictures by adding a shading effect, and add captions to images.-Support only Landscape and Landscape-flipped orientations.-Ensure that users can select and modify images from the PictureChooserPage page.-Ensure that users can change the magnification of the selected image and resize the image by using pinch and stretch gestures. Scaling should be fluid and precisely controlled by the user.The app must be localized for the French Canadian market.

Technical RequirementsThe app must meet the following technical requirements:-Scroll bars must not be visible.-The CaptionTextBlock and CaptionTextBox controls must appear side by side, without overlapping and on the same line. The CaptionTextBox control should appear to the right of the CaptionTextBlock control.-The ContactPicker object must be filtered to display only email addresses.-Minimize the code that is required to implement optical zoom functionality.You must perform the following tasks:-Handle the Click event of the GetPictureButton control to switch from the current page to thePictureChooserPage page.-After the user selects an image on the PictureChooserPage page, ensure that the app navigates back tothe PictureSharerMainPage page.-Track the current screen orientation and page size by updating the _currentViewState, _currentHeight,and _currentWidth fields every time the screen orientation or page size changes.-Create a style named ButtonStyleWhite that inherits all the style settings of the ButtonStyleRed styleexcept the border color; the border color must be white. The ButtonStyleWhite style must automaticallyupdate with any changes that are made to the ButtonStyleRed style.-Create a resource named ButtonForegroundColor to implement the button foreground color so that it canbe referenced in XAML by using the following standard syntax:Foreground="{StaticResource ButtonForegroundColor}"-Ensure that the OnNavigatedTo() method updates the current picture when a new picture is selected.-Change the background for the root Grid element to a vertical gradient that transitions from black at the top to maroon at the bottom. Create a resource named GridBackgroundGradientBrush to hold the requested gradient.

While testing the app, you observe the following results:-An exception is being thrown in the GetContactsCompleted event handler when the retrieved email address is assigned to the RecipientsTextBlock control. The exception message states: "The application called an interface that was marshalled for a different thread."-When users navigate away from the PictureSharerMainPage page, information that was entered in the CaptionTextBox control is lost.

A. Option CB. Option BC. Option AD. Option D

Answer: C

Explanation:* The CaptionTextBlock and CaptionTextBox controls must appear side by side, without overlapping and on the same line.The CaptionTextBox control should appear to the right of the CaptionTextBlock control.
