NEW QUESTION: 1Your software development team works within a single team project in a team project collection. You have one build controller and one build agent associated to your team project collection. Multiple build definitions are configured. You notice that builds occasionally wait in the queue for a long time before the build starts. You need to reduce the amount of time that your builds wait in the queue. What should you do? **A.** Configure your build agent to run multiple builds at the same time. **B.** Configure additional build controllers, and associate them to the build agent already in use. **C.** Configure additional build agents, and associate them to the build controller already in use. **D.** Change the Name filter argument on your build definition so that the build agent is found more quickly. **Answer: A** Explanation: Explanation/Reference:
