Besides, the price is affordable, it is really worthy being chosen, The CISSP video training can not be intricate anymore with the tremendous help from online Photoexperienceacademy's CISSP study guide and authentic CISSP dumps online created by our experts.

The A+ Essentials course teaches you everything you need to know to choose various [CISSP](#) PC components when ordering a new PC, and lets you practice hardware and configuration tasks that can be performed without opening the inside of the PC case.

It does not take long to download the free demo, The way to success is diverse.

**NEW QUESTION: 1**What is the advantage of specifying three load balancing methods when load balancing within pools?**A.** Specifying three methods allows the GTM System alternate methods if insufficient data is available for other methods.**B.** Specifying three methods allows the GTM System to choose the optimal method for each name resolution.**C.** Specifying three methods allows the GTM System to rotate between the three methods so that no one method is used too often.**D.** Specifying three methods allows the GTM System to use all three methods simultaneously.**Answer: A**

**NEW QUESTION: 2**Meyer Electronics Systems just recently had a number of laptops stolen out of their office. On these laptops contained sensitive corporate information regarding patents and company strategies. A month after the laptops were stolen, a competing company was found to have just developed products that almost exactly duplicated products that Meyer produces. What could have prevented this information from being stolen from the laptops?**A.** DFS Encryption**B.** SDW Encryption**C.** EFS Encryption**D.** IPS Encryption**Answer: C**

**NEW QUESTION: 3**You need to define a custom domain name for Azure AD to support the planned infrastructure. Which domain name should you use?**A.** Install Azure AD Connect on a server in the Miami office and enable Pass-through Authentication**B.** Install the Active Directory Federation Services (AD FS) role on a domain controller in the Miami office.**C.** Allow inbound TCP port 8080 to the domain controllers in the Miami office.**D.** Add <http://autologon.microsoftazuread-sso.com> to the intranet zone of each client computer in the Miami office.**E.** Join the client computers in the Miami office to Azure AD.**Answer: A,D**  
Explanation: Every Azure AD directory comes with an initial domain name in the form of domainname.onmicrosoft.com. The initial domain name cannot be changed or deleted, but you can add your corporate domain name to Azure AD as well. For example, your organization probably has other domain names used to do business and users who sign in using your corporate domain name. Adding custom domain names to Azure AD allows you to assign user names in the directory that are familiar to your users, such as '[\[email&#160;protected\]](#).' instead of 'alice@domainname.onmicrosoft.com'.  
Scenario: Network Infrastructure: Each office has a local data center that contains all the servers for that office. Each office has a dedicated connection to the Internet. Humongous Insurance has a single-domain Active Directory forest named humongousinsurance.com  
Planned Azure AD Infrastructure: The on-premises Active Directory domain will be synchronized to Azure AD.
