NEW QUESTION: 1You need to recommend which type of group must be used to create the planned department lists.Which type of group should you recommend?**A.** Global Security**B.** Universal Distribution**C.** Universal Security**D.** Dynamic Distribution**Answer: B****Explanation:** Explanation/Reference:Explanation:There are two types of groups that can be used to distribute messages:Mail-enabled universal distribution groups (also called distribution groups) can be used only to distribute messages.Mail-enabled universal security groups (also called security groups) can be used to distribute messages as well as to grant access permissions to resources in Active Directory. For more information, see Manage Mail-Enabled Security Groups.A mail-enabled security group is an Active Directory universal security group object that can be used to assign access permissions to resources in Active Directory and can also be used to distribute messages.It's important to note the terminology differences between Active Directory and Exchange.In Active Directory, a distribution group refers to any group that doesn't have a security context, whether it's mail-enabled or not. In contrast, in Exchange, all mail-enabled groups are referred to as distribution groups, whether they have a security context or not.Dynamic Distribution GroupsUnlike regular distribution groups that contain a defined set of members, the membership list for dynamic distribution groups is calculated each time a message is sent to the group, based on the filters and conditions that you define. When an email message is sent to a dynamic distribution group, it's delivered to all recipients in the organization that match the criteria defined for that group.
