So that you do not worry that our exam files are not the latest version, Now, there is good news for candidates who are preparing for the APA FPC-Remote test.

It provides demos of each version for you, freely, The excellent quality of our FPC-Remote content, their relevance with the actual exam needs and their interactive and simple [New Salesforce-AI-Associate Test Answers](#) format will prove them superior and quite pertinent to your needs and requirements.

Our company has a good reputation **FPC-Remote Vce Torrent** in industry and our products are well praised by customers.

NEW QUESTION: 1A company has application running on Amazon EC2 instances in a VPC. One of the applications needs to call an Amazon S3 API to store and read objects. The company's security policies restrict any internet-bound traffic from the applications.Which action will fulfill these requirements and maintain security?**A.** Create an S3 bucket in a private subnet.**B.** Create an S3 bucket in the same Region as the EC2 instance.**C.** Configure an S3 gateway endpoint.**D.** Configure an S3 interface endpoint.**Answer: D**Explanation:ExplanationVPC endpointsA VPC endpoint enables you to privately connect your VPC to supported AWS services and VPC endpoint services powered by AWS PrivateLink without requiring an internet gateway, NAT device, VPN connection, or AWS Direct Connect connection. Instances in your VPC do not require public IP addresses to communicate with resources in the service. Traffic between your VPC and the other service does not leave the Amazon network.An interface endpoint is an elastic network interface with a private IP address from the IP address range of your subnet that serves as an entry point for traffic destined to a supported service. Interface endpoints are powered by AWS PrivateLink, a technology that enables you to privately access services by using private IP addresses. AWS PrivateLink restricts all network traffic between your VPC and services to the Amazon network. You do not need an internet gateway, a NAT device, or a virtual private gateway.

<https://docs.aws.amazon.com/vpc/latest/userguide/vpc-endpoints.html>

NEW QUESTION: 2You need to configure your mobile device to send and receive electronic messages from your company.You must use the company's WLAN as all e-mail services are on default non-secure ports.The company's WLAN is broadcasting across the company for easier access.
