NEW QUESTION: 1A. Option B. Option C. Option D. Answer: D Explanation: VRRP Definitions VRRP Router A router running the Virtual Router Redundancy Protocol. It may participate in one or more virtual routers. Virtual Router An abstract object managed by VRRP that acts as a default router for hosts on a shared LAN. It consists of a Virtual Router Identifier and a set of associated IP address(es) across a common LAN. A VRRP Router may backup one or more virtual routers. IP Address Owner The VRRP router that has the virtual router's IP address(es) as real interface address(es). This is the router that, when up, will respond to packets addressed to one of these IP addresses for ICMP pings, TCP connections, etc. Primary IP Address An IP address selected from the set of real interface addresses. One possible selection algorithm is to always select the first address. VRRP advertisements are always sent using the primary IP address as the source of the IP packet. Virtual Router Master The VRRP router that is assuming the responsibility of forwarding packets sent to the IP address(es) associated with the virtual router, and answering ARP requests for these IP addresses. Note that if the IP address owner is available, then it will always become the Master. Reference: <http://www.ietf.org/rfc/rfc3768.txt>

NEW QUESTION: 2A. Option D. Option C. Option A. Option B Answer: D

NEW QUESTION: 3 You are the project manager of a software project. Two developers, Bill and Alfredo, are having an argument about how to implement a feature. Bill thinks that it's more important that the project get done quickly, so he's suggesting that you re-use some work that's been done on a previous project to get started. Alfredo thinks that that work doesn't apply to this project and will just waste time. Bill is almost always right about these things and he's very influential on the team, so it's important that you keep him happy. What should you do? **A.** Call a meeting to hear both sides of the situation and decide in favor of the solution that is best supported by objective evidence. **B.** Call a meeting in private with Bill to hear more about his position. **C.** Side with Alfredo. It could end up taking longer in the end. **D.** Since you do want to get the project done quickly, you side with Bill. **Answer: A** Explanation: You can't know the answer to technical questions as well as your team. So, while it's important to understand both sides of the issue, your job is to make sure that problems are confronted and fairly evaluated.

NEW QUESTION: 4 Identify the data security measure which defines a principle or state that ensures that an action or transaction cannot be denied. **A.** Authorization **B.** Integrity **C.** Availability **D.** Non-Repudiation **Answer: D** Explanation: Reference: [http://en.wikipedia.org/wiki/Information_security\(non-repudiation\)](http://en.wikipedia.org/wiki/Information_security(non-repudiation))
