NEW QUESTION: 1HOTSPOTYou need to recommend a database availability group (DAG) design that meets the technical requirements. Which DAG design should you recommend? To answer, select the appropriate design in the answer area.**Answer:** Explanation: Topic 3, Contoso Ltd Overview General Overview Contoso, Ltd., is an aerospace engineering company that manufactures jet engine parts for various industries and government agencies. Contoso has an Exchange Server 2013 organization. A partner company named Tailspin Toys has an Exchange Server 2010 organization. Physical Locations Contoso has two offices. The offices are located in Montreal and Chicago. Each office contains a data center: The Montreal and Chicago offices connect to each other by using a direct WAN link. All connections to the Internet are routed through the Montreal office. Most of Contoso's employees work from the Montreal office. Existing Environment The network of Contoso is configured as shown in the exhibit. (Click the Exhibit button.) The network of Contoso contains the following components: Client computers that run either Microsoft Outlook 2007 or Outlook 2010. Users who have a primary SMTP address that uses the contoso.com suffix. A retention policy that retains all email messages for 580 days and is associated to all users. Six servers that have Exchange Server installed. The servers are configured as shown in the following table. A data availability group (DAG) named DAG1 that contains all of the mailbox servers. EX5 is configured as the witness server for DAG1. A file server in the Chicago office is configured as an alternate witness server. DAG1 has Datacenter Activation Coordination (DAC) mode enabled. Requirements Planned Changes Contoso plans to implement the following changes: Implement an organization relationship between Contoso and Tailspin Toys. Move the mailboxes of all the members of the sales department to Office 365. Evaluate Unified Messaging (UM) by conducting a small pilot in the Montreal office. Security Requirements Contoso identifies the following security requirements: Ensure that the data in the Exchange Server databases cannot be read if a hard disk is stolen. Prevent temporary employees from executing a Reply All or a Forward of any email messages they receive. Prevent temporary contractors from changing the configurations of the user accounts for the users in the research and development department. Ensure that all of the connections to Outlook Web App from the Internet use Extensible Authentication Protocol (EAP) protocols and Transport Layer Security (TLS) protocols. Secure all of the email

messages from the users at Tailspin Toys to the Contoso users. Ensure that all of the messages can be secured if the certificates at Tailspin Toys are issued by a trusted third-party certification authority (CA). Auditing Requirements Contoso identifies the following requirements for auditing mailboxes: The manager of the legal department must receive a daily report by email that contains a record of all the eDiscovery mailbox searches. Any access to a mailbox by a service account must be excluded from the daily report. Compliance Requirements All of the email messages in the Sent Items folder of each user in the marketing department of Contoso must be deleted automatically after 365 days. Office 365 Coexistence Requirements Contoso identifies the following Office 365 coexistence requirements: Office 365 users must be able to access their mailbox by using their Active Directory user account in Contoso. On-premises users must be able to share free/busy information and calendar information with the Office 365 users.

NEW QUESTION: 2 Even though there are business rules to keep State and Incident State in sync, it is recommended to use Incident State. **A. True B. False**
Answer: B
Explanation: It is recommended to use State field.

NEW QUESTION: 3 The network manager has requested a 300-workstation expansion of the network. The workstations are to be installed in a single broadcast domain, but each workstation must have its own collision domain. The expansion is to be as cost-effective as possible while still meeting the requirements. Which three items will adequately fulfill the request? (Choose three). **A. Two IP subnets with a mask of 255.255.255.0 B. One router interface C. One IP subnet with a mask of 255.255.254.0 D. Seven 48-port switches E. Seven router interfaces F. Seven 48-port hubs**
Answer: B, C, D
Explanation: To support 300 workstations in a single broadcast domain, we need to use a subnet mask which supports 512 hosts $= 2^9 \rightarrow /23$ or 255.255.254.0 in decimal form \rightarrow A is correct. If we use 48-port switches we need $300/48 = 6.25 \rightarrow$ seven 48-port switches are enough because we also need trunking between them \rightarrow D is correct. We only need one router interface and it is connected with one of seven switches \rightarrow E is correct.
