NEW QUESTION: 2A technician is helping a SOHO determine where to install the server. Which of the following should be consideredFIRST?**A.** Cable length**B.** Compatibility requirements**C.** Environment limitations**D.** Equipment limitations**Answer: C**Explanation:SOHO stands for Small Office / Home Office. A SOHO network istypically a small network. Being a small network, it is unlikely that it will have a datacenter or even a dedicated server room. Any servers installed in the network will stillhave the same environmental requirements as servers in a large network. The servers should be in a secure isolatedarea if required. The servers also need to be kept cool and dry. Therefore, the first consideration in a SOHO office is"Environment limitations": where the servers and other network hardware will be located.

NEW QUESTION: 3You have to import several transport requests into an AS ABAP-based SAP system using transaction STMS (Transport Management System). In the import queue of one of the SAP systems the "Import Request" (Import Single) button is displayed, but the "Import All Requests" (Import All) button is missing.What could be the reason?**A.** The authorization for "Import All Requests" is missing for the respective SAP system.**B.** The "Import All Requests" button is never available in a development system.**C.** Client-specific transport routes have been configured.**D.** The "Queue-controlled transports, single transports" strategy has been set.
Answer: D

NEW QUESTION: 4Testlet: Humongous Insurance You need to recommend a BitLocker recovery method that meets the company's technical requirements.Which recovery method should you recommend? Humon1 (exhibit):Humon2 (exhibit):**A.** a data recovery agent**B.** arecoverypasswordstoredinActiveDirectory**C.** a recovery key**D.** a recovery password printed and stored in a secure location**Answer: A**Explanation:
<http://technet.microsoft.com/en-us/library/dd875560%28WS.10%29.aspx>Data recovery agents

are accounts that are able to decrypt BitLocker-protected drives by using their smart card certificates and public keys. Recovery of a BitLocker-protected drive can be accomplished by a data recovery agent that has been configured with the proper certificate. Before a data recovery agent can be configured for a drive, you must add the data recovery agent to Public Key Policies BitLocker Drive Encryption in either the Group Policy Management Console (GPMC) or the Local Group Policy Editor. You must also enable and configure the Provide the unique identifiers for your organization policy setting to associate a unique identifier to a new drive that is enabled with BitLocker. An identification field is a string that is used to uniquely identify a business unit or organization. Identification fields are required for management of data recovery agents on BitLocker-protected drives. BitLocker will only manage and update data recovery agents when an identification field is present on a drive and is identical to the value configured on the computer.
