NEW QUESTION: 1You develop a SharePoint app to create an approval workflow for expense reports. The app must collect user input before starting the workflow.You need to use ASP.NET forms in the workflow.Which form type should you use?**A.** Workflow input form**B.** Workflow initiation form**C.** Workflow modification form**D.** Workflow task form**Answer: B****Explanation:** Explanation/Reference:Explanation:You may want your workflow to collect information from the person who starts it, and then reference this information later in the workflow. For example, imagine that you are designing a workflow that assigns a document review task. In some workflows of this kind, it might make sense to always automatically assign the review task to the same participant and to always use the same formula for calculating the due date. But in your workflow, you want the person who manually starts the workflow to specify both the reviewer and the due date. You can set this up by adding custom fields to the workflow initiation form and requiring that the workflow be started manually.Reference: Create a workflow initiation form

After you assign an agent to a resource group and assign skills, you need to configure the CSQs. You assign agents to a CSQ by associating a resource group or by associating all skills of a particular CSQ. Agents in the selected resource group or who have all the selected skills are assigned to the CSQ. Skills within the CSQ can be ordered. This means, when resources are selected, a comparison is done based on the competency level (highest for "most skilled" and lowest for "least skilled") of the first skill in the list. If there is a "tie" the next skill within the order is used, and so on.Reference: http://www.cisco.com/c/en/us/td/docs/voice_ip_comm/cust_contact/contact_center/crs/express_10_0/configuration/guide/UCCX_BK_W1AF9DDD_00_uccx-admin-guide-100/UCCX_BK_W1AF9DD_00_uccx-admin-guide-100_chapter_0111.html#UCCX_TP_C6155D52_00Topic 8, Cisco Unified IM and Presence
