In the answers, our experts will provide the authorized verification **HP2-I58 Latest Guide Files** and detailed demonstration so as to let the learners master the latest information timely and follow the trend of the times.

NEW QUESTION: 1 A human resources employee sends out a mass email to all employees that contains their personnel records. A security analyst is called in to address the concern of the human resources director on how to prevent this from happening in the future. Which of the following would be the BEST solution to recommend to the director? **A.** Train all employees. Encrypt data sent on the company network. Bring in privacy personnel to present a plan on how PII should be handled. **B.** Install specific equipment to create a human resources policy that protects PII data. Train company employees on how to handle PII data. Outsource all PII to another company. Send the human resources director to training for PII handling. **C.** Install a data loss prevention system, and train human resources employees on its use. Provide PII training to all employees at the company. Encrypt PII information. **D.** Enforce encryption on all emails sent within the company. Create a PII program and policy on how to handle data. Train all human resources employees. **Answer: C**

NEW QUESTION: 2 Contosoのストレージ要件を特定する必要があります。
次の各ステートメントについて、ステートメントがtrueの場合は[はい]を選択します。それ以外の場合は、[いいえ]を選択します。注：それぞれの正しい選択は1ポイントの価値があります。
Answer: Explanation: Explanation: Statement 1: Yes Contoso is moving the existing product blueprint files to Azure Blob storage which will ensure that the blueprint files are stored in the archive storage tier. Use unmanaged standard storage for the hard disks of the virtual machines. We use Page Blobs for these. Statement 2: No Azure Table storage stores large amounts of structured data. The service is a NoSQL datastore which accepts authenticated calls from inside and outside the Azure cloud. Azure tables are ideal for storing structured, non-relational data. Common uses of Table storage include: 1. Storing TBs of structured data capable of serving web scale applications 2. Storing datasets that don't require complex joins, foreign keys, or stored procedures and can be denormalized for fast access 3. Quickly querying data using a clustered index 4. Accessing data using the OData protocol and LINQ queries with WCF Data Service .NET Libraries Statement 3: No File Storage can be used if your business use case needs to deal mostly with standard File extensions like *.docx, *.png and *.bak then you should probably go with this storage option. Reference:
