Answer: Explanation:Topic 4, Litware, Inc (A)OverviewLitware, Inc. is a manufacturing company. Litware has a large data center and several offices.Existing EnvironmentNetwork InfrastructureThe network contains a third-party network management device that supports SNMPv3. The network contains network devices that support ICMP and SNMP and other devices that support SNMP only.A group named Network Technicians contains the user accounts for the support technicians who manage all of the network servers. The support technicians regularly install updates on the network servers.System Center 2012 Infrastructure Litware has all of the System Center 2012 components installed in the data centers. Service Manager is integrated with Configuration Manager and Operations Manager.The System Center 2012 Monitoring Pack for UNIX and Linux Operating Systems is installed on the Operations Manager servers.Software updates are deployed by using Windows Server Update Services (WSUS) and Configuration Manager.Virtualization InfrastructureLitware has 30 Hyper-V hosts that run Windows Server 2008 R2. The Hyper-V hosts are members of failover clusters.Each office contains two virtual machines that run Microsoft SQL Server 2008 R2. The virtual machines are configured in a failover cluster.You have 100 virtual machines that run the following operating systems:-----Windows Server 2012 Windows Server 2008 R2 Windows Server 2003 R2 Red Hat Enterprise Linux 6 SUSE Linux Enterprise Server 11Application Infrastructure Litware has a distributed application named App1 that is installed on several virtual machines. The failover clusters host the databases used by App1. The components of App1 are in a service template and a distributed application design.Several other applications are installed on dedicated application servers. The application servers are deployed as virtual machines. Problem StatementsLitware identifies the following issues: The primary service of App1, named App1Service, hangs frequently and logs events in the application log on theserver where

ApplService fails. A recent security audit discovers that servers are vulnerable to attack due to----misconfigurations of the operating system.RequirementsPlanned ChangesLitware plans to implement the following changes: Replace the third-party network monitoring solution by using a System Center 2012 solution. The System Center 2012 solution must monitor all of the devices monitored by the third-party solution and must discover new devices. On all of the virtual machines that have App1 installed, update App1 to a new version.Technical RequirementsLitware identifies the following technical requirements: Application administrators must be able to back up and restore their respective application servers. Each server must be backed up at a different time. All virtual machines must be deployed by using virtual machine templates. The templates must be prepared by using Sysprep.- All resolved Service Manager incidents must close automatically after 72 hours.Availability Requirements Litware identifies the following availability requirements: - Each request by a support technician to place a server in maintenance mode must be approved by a network administrator. - App1 must have 99.99 percent availability.
