NEW QUESTION: 1The physical security department received a report that an unauthorized person followed an authorized individual to enter a secured premise. The incident was documented and given to a security specialist to analyze. Which step should be taken at this stage?**A.** Identify assets the attacker handled or acquired**B.** Identify movement of the attacker in the enterprise**C.** Determine the assets to which the attacker has access**D.** Change access controls to high risk assets in the enterprise**Answer: B**

NEW QUESTION: 2Which of the following is the correct name of a helper class that should be extended to define your own Java-backed web scripts that take full control of the http request?**A.** BasicWebScript**B.** WebScriptImpl**C.** AbstractWebScript**D.** DeclarativeWebScript**Answer: D**
Explanation:ExplanationReferences
<https://community.alfresco.com/thread/166539-java-backed-webscript-and-freemarker-templates>

NEW QUESTION: 3Your network contains a DNS zone for contoso.com. All servers register their host names in DNS by using dynamic updates.The network contains a server named Server1.contoso.com. From a computer named Computer1 that runs Windows 7, you successfully resolve Server1.contoso.com to an IP address.You change the IP address of Server1.contoso.com. From Computer1, you discover that server1.contoso.com still resolves to the old IP address. You successfully connect to server1.contoso.com by using the new IP address.You need to ensure that you can immediately resolve Server1.contoso.com to the new IP address.What should you do on Computer1?**A.** Run dnscacheugc.exe.**B.** Run ipconfig.exe and specify the /flushdns parameter.**C.** Restart the Peer Name Resolution Protocol (PNRP) service.**D.** Run netsh.exe and specify the dnsclient context.**Answer: B**

NEW QUESTION: 4Refer to the exhibit.A Cisco Catalyst 6500 Series Switch experiences high CPU utilization. What can be the cause of this issue, and how can it be prevented?**A.** The software routing table is full. Reduce the number of routes in the routing table.**B.** The hardware routing table is full. Reduce the number of routes in the routing table.**C.** The hardware routing table is full. Redistribute from BGP into IGP.**D.** The software routing table is full. Redistribute

from BGP into IGP.**Answer: B**Explanation:FIB TCAM Exception - If you try to install more routes than are possible into the FIB TCAM you will see the following error message in the logs:
%CFIB-SP-7-CFIB_EXCEPTION : FIB TCAM exception, Some entries will be softwareswitched.
%CFIB-SP-7-CFIB_EXCEPTION : FIB TCAM exception, Some entries will be softwareswitched.
%CFIB-SP-7-CFIB_EXCEPTION : FIB TCAM exception, Some entries will be software switched.
This error message is received when the amount of available space in the TCAM is exceeded. This results in high CPU. This is a FIB TCAM limitation. Once TCAM is full, a flag will be set and FIB TCAM exception is received. This stops from adding new routes to the TCAM. Therefore, everything will be software switched. The removal of routes does not help resume hardware switching. Once the TCAM enters the exception state, the system must be reloaded to get out of that state. You can view if you have hit a FIB TCAM exception with the following command:
6500-2#sh mls cef exception status
Current IPv4 FIB exception state = TRUE
Current IPv6 FIB exception state = FALSE
Current MPLS FIB exception state = FALSE
When the exception state is TRUE, the FIB TCAM has hit an exception. The maximum routes that can be installed in TCAM is increased by the mls cef maximum-routes command.
