What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point **Answer:** Explanation:

NEW QUESTION: 4 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to

return to it. As a result, these questions will not appear in the review screen. Your company has 100 users located in an office in Paris. The on-premises network contains the servers shown in the following table. You create a new subscription. You need to move all the servers to Azure.

Solution: You use Azure Site Recovery. Does this meet the goal? **A. No** **B. Yes** **Answer: B**

Explanation: As an organization you need to adopt a business continuity and disaster recovery (BCDR) strategy that keeps your data safe, and your apps and workloads online, when planned and unplanned outages occur. Azure Recovery Services contributes to your BCDR strategy: * Site Recovery service: Site Recovery helps ensure business continuity by keeping business apps and workloads running during outages. Site Recovery replicates workloads running on physical and virtual machines (VMs) from a primary site to a secondary location. When an outage occurs at your primary site, you fail over to secondary location, and access apps from there. After the primary location is running again, you can fail back to it. * Backup service: The Azure Backup service keeps your data safe and recoverable. Site Recovery can manage replication for: * Azure VMs replicating between Azure regions. * On-premises VMs, Azure Stack VMs, and physical servers. Reference:
