**NEW QUESTION: 1** A system administrator has a responsibility to maintain the security of the video teleconferencing system. During a self-audit of the video teleconferencing room, the administrator notices that speakers and microphones are hard-wired and wireless enabled. Which of the following security concerns should the system administrator have about the existing technology in the room? **A.** Bluetooth speakers could cause RF emanation concerns. **B.** Bluetooth is an unsecure communication channel. **C.** Wired transmissions could be intercepted by remote users. **D.** Wireless transmission causes interference with the video signal. **Answer: B**

**NEW QUESTION: 2** A billing document is outsourced and needs to be corrected. How do you proceed? **A.** 1. Reverse the billing document 2. Correct the billing order 3. Restart the billing process **B.** 1. Remove the indicator for manual outsourcing 2. Release the outsourced document 3. Continue the billing process **C.** 1. Correct the rate data 2. Release the outsourced document 3. Continue the billing process **D.** 1. Reverse the billing document 2. Correct the master data 3. Restart the billing process **Answer: D**

**NEW QUESTION: 3** When you are a portfolio manager, you need to do and re-do multiple processes in order to maintain the portfolio alignment to the changing strategies. Which of the following are considered outputs to the Develop Charter process? **A.** Portfolio Strategic Plan updates, Portfolio Charter, Portfolio Management Plan Updates **B.** Portfolio Strategic Plan updates, Portfolio Charter, Portfolio Reports **C.** Portfolio Strategic Plan updates, Portfolio Charter, Portfolio Roadmap Updates **D.** Portfolio Strategic Plan updates, Portfolio Charter, Portfolio Process Assets updates **Answer: D**

**NEW QUESTION: 4** **A.** Option B **B.** Option A **C.** Option D **D.** Option C **Answer: B** **Explanation:** Explanation The payroll system is not meeting security policy due to missing OS security patches. We cannot apply the patches to the system because the vendor states that the system is only supported on the current OS patch level. Therefore, we need another way of securing the system. We can improve the security of the system and the other systems on the network by

isolating the payroll system on a secure network to limit its contact with other systems. This will reduce the likelihood of a malicious user accessing the payroll system and limit any damage to other systems if the payroll system is attacked.
