We will create more and more good products by using the power of technology.

NEW QUESTION: 1 You have a table that contains sales data and approximately 1,000 rows. You need to identify outliers in the table. Which type of visualization should you use?**A.** donut chart **B.** pie chart**C.** scatter plot**D.** area chart**Answer: C**Explanation:Topic 1, Contoso Ltd, Case Study OverviewThis is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.To start the case studyTo display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question. Existing EnvironmentContoso, Ltd. is a manufacturing company that produces outdoor equipment Contoso has quarterly board meetings for which financial analysts manually prepare Microsoft Excel reports, including profit and loss statements for each of the company's four business units, a company balance sheet, and net income projections for the next quarter. Data and SourcesData for the reports comes from three sources. Detailed revenue, cost and expense data comes from an Azure SQL database. Summary balance sheet data comes from Microsoft Dynamics 365 Business Central. The balance sheet data is not related to the profit and loss results, other than they both relate to dates.Monthly revenue and expense projections for the next quarter come from a Microsoft SharePoint Online list.Quarterly projections relate to the profit and loss results by using the following shared dimensions: date, business unit, department, and product category.Net Income Projection DataNet income projection data is stored in a SharePoint Online list named Projections in the format shown in the following table. Revenue projections are set at the monthly level and summed to show projections for the quarter.Balance Sheet DataThe balance sheet data is imported with final balances for each account per month in the format shown in the following table.There is always a row for each

account for each month in the balance sheet data.Dynamics 365 Business Central DataBusiness Central contains a product catalog that shows how products roll up to product categories, which roll up to business units. Revenue data is provided at the date and product level. Expense data is provided at the date and department level.Business IssuesHistorically, it has taken two analysts a week to prepare the reports for the quarterly board meetings. Also, there is usually at least one issue each quarter where a value in a report is wrong because of a bad cell reference in an Excel formula. On occasion, there are conflicting results in the reports because the products and departments that roll up to each business unit are not defined consistently.Planned ChangesContoso plans to automate and standardize the quarterly reporting process by using Microsoft Power Bl. The company wants to how long it takes to populate reports to less than two days. The company wants to create common logic for business units, products, and departments to be used across all reports, including, but not limited, to the quarterly reporting for the board.Technical RequirementsContoso wants the reports and datasets refreshed with minimal manual effort The company wants to provide a single package of reports to the board that contains custom navigation and links to supplementary information.Maintenance, including manually updating data and access, must be minimized as much as possible.Security RequirementsThe reports must be made available to the board from powerbi.com. A mail-enabled security group will be used to share information with the board.The analysts responsible for each business unit must see all the data the board sees, except the profit and loss data, which must be restricted to only their business unit's data. The analysts must be able to build new reports from the dataset that contains the profit and loss data, but any reports that the analysts build must not be included in the quarterly reports for the board. The analysts must not be able to share the quarterly reports with anyone.Report RequirementsYou plan to relate the balance sheet to a standard date table in Power Bl in a many-to-one relationship based on the last day of the month. At least one of the balance sheet reports in the quarterly reporting package must show the ending balances for the quarter, as well as for the previous quarter.Projections must contain a column named RevenueProjection that contains the revenue projection amounts. A relationship must be created from Projections to a table named Date that contains the columns shown in the following table.The relationships between products and departments to business units must be consistent across all reports.The board must be able to get the following information from the quarterly reports:* Revenue trends over time* Ending balances for each account* A comparison of expenses versus projections by quarter* Changes in long-term liabilities from the previous quarter* A comparison of quarterly revenue versus the same quarter during the prior year

NEW QUESTION: 2RESTful API를 통해 Java 기반 웹 감지 / 얼음을 사용하는 공개 애플리케이션을 실행하는 회사 30 % CPU 사용률로 일관되게 실행되는 데이터 센터의 단일 서버에서 Apache Tomcat에 호스팅됩니다. API 사용이 예상됩니다. 새로운 제품 출시로 10 배 증가 비즈니스는 중단없이 애플리케이션을 AWS로 마이그레이션하고 수요에 맞게 확장해야 합니다. 회사는 이미 Amazon Route 53 및 CNAME 레코드를 사용하여 트래픽을 리디렉션하기로 결정했습니다. 최소한의 노력으로 만날 수 있습니까?**A.** Amazon API Gateway를 통해 웹 서비스를 호출하도록 애플리케이션을 수정 한 다음 Java 웹 서비스 코드를 실행하기 위해 새 AWS Lambda Java 함수를 생성하십시오. Lambda 함수를 사용하도록 API Gateway를 테스트 한 후 테스트**B.** AWS SMS를 사용하여 Apache 서버를 클라우드로 들어 올린 다음 웹 서비스 트래픽을 새 인스턴스로 보내도록 애플리케이션을 전환하십시오.**C.** Docker 이미지를 생성하고 이미지를 Amazon ECS로 마이그레이션 한 다음 웹 서비스 쿼리를 ECS 컨테이너로 보내도록 애플리케이션 코드를 변경하십시오.**D.** AWS Elastic Beanstalk를 사용하여 Java 웹 서비스를 배포하고 Auto Scaling을 활성화 한 다음 새 웹 서비스를 사용하도록 애플리케이션을 전환하십시오.**Answer: D**

NEW QUESTION: 3 In which position would a patient with emphysema be able to enhance the effectiveness of breathing?**A.** Sitting in a recliner**B.** On the side, lying in bed**C.** Sitting on the side of the bed and leaning on an overbed table**D.** Sitting up in bed**Answer: C**Explanation:The patient with emphysema would be able to enhance their breathing by sitting on the sideof the

bed and leaning on an overbed table. Other effective positions for the patient would be resting theelbows on the knees and standing while leaning against a wall.

NEW QUESTION: 4 Azure ApplicationInsightsを使用します。
継続的なエクスポートを使用する予定です。
ApplicationInsightsデータを5年間保存する必要があります。
どのAzureサービスを使用する必要がありますか？**A.** Azure Backup**B.** Azure SQL Database**C.** Azure Storage**D.** Azure Monitor Logs**Answer: C**
