Create a host-named site collection and use a single farm that contains a single consolidated web application.B. Create a host-named site collection and use a single farm that contains all the web applications.C. Use a path-based site collection and a single farm that contains all the web applications.D. Use a path-based site collection and alternate access mappings.****Answer: B****Explanation:**Topic 3, Blue Yonder Airlines BackgroundGeneral BackgroundYou are the SharePoint administrator for Blue Yonder Airlines. The company currently has a SharePoint 2010 environment. It is your responsibility to install and configure a SharePoint 2013 environment that will be used for information management and collaboration, both internally and with external partners. You must also migrate the existing SharePoint environment to SharePoint 2013.Blue Yonder works with several external partners, including those described in the following table.Blue Yonder collaborates with Wingtip Toys and Tailspin Toys to design, manufacture, and sell airline-related toys to customers. The Blue Yonder board of directors expects the collaborative design process to become more effective as a result of implementing SharePoint 2013.Technical BackgroundAll existing servers run Windows Server 2008 R2. The network infrastructure contains an Active Directory Domain Services (AD DS) environment. The internal AD DS domain is named blueyonderairlines.com. User-specific contact information is stored and managed in AD DS. All employees are located in the ActiveUsers organizational unit (OU). Active Directory Federation Services (AD FS) is deployed in the LAN. Two AD FS proxy servers are deployed in the perimeter network. Users log on to client computers by using the syntax [\[email protected\]](#).Blue Yonder provides access to the SharePoint environment to partners through individual URLs for each partner company. Each partner company has a dedicated web application and site collection. The following table describes the access URLs.application.In preparation for the upgrade you maximize the default upload limits for each web Blue Yonder has an existing managed metadata service containing managed metadata and content types. The content types have workflows. You create a new managed metadata service connection for the Wingtip Toys web application. A workflow created by Blue Yonder moves information through the product lifecycle. Each -access URL specifies a separate web application, site collection, and site.Business RequirementsThe SharePoint environment must meet the following business requirements: Provide an environment where toy design, manufacturing, and sales information can be shared between Blue Yonder and partner companies.-- -- -- --Provide a training site for internal and external users.Allow content authors of training materials to upload documents, large image files,and large video files for consumption by internal and external users.Allow

users to sort content by category. Ensure that users from Wingtip Toys or Tailspin Toys can access content only in their own areas of the portal. Prevent users from Wingtip Toys and Tailspin Toys from adding terms or creating enterprise keywords. Content types and keywords must be shared between sites, site collections, and web applications. Simplify search processes by collecting unique characteristics and information about each uploaded item. Allow administrators to promote search query results across the entire environment. Allow resource coordinators from Blue Yonder to find temporary staffing options from Margie's Travel contractors and employees. Provide opportunities for social interaction between employees, contractors, and external contacts to promote idea generation and socialization. Utilize site feeds on all collaborative sites. Replicate profile information in the <https://blueyonderairlines.com> site to partner sites. Ensure that third-party vendors can read and modify documents. For publishing sites, use only friendly URLs that do not contain anything other than the direct address. Avoid URL constructions such as `/Lists/Posts/Post.aspx?ID=568`. Site content must meet the following requirements: Individual training videos must be in single files, and presented on the training site. Changes to confidential documents must be logged. Technical Requirements You must meet the following technical requirements: Store all large files outside of the SharePoint content database or databases. All servers must run on virtual machines. Ensure that search queries are handled by web servers. Ensure that all lists support multiple content types.
