**NEW QUESTION: 1**The copyright law ("original works of authorship") protects the right of the owner in all of the following except?**A.** Reproduction of the idea**B.** Display of the idea**C.** The public distribution of the idea**D.** The idea itself**Answer: D****Explanation:**A copyright covers the expression of ideas rather than the ideas themselves; it usually protects artistic property such as writing, recordings, databases, and computer programs. In most countries, once the work or property is completed or is in a tangible form, the copyright protection is automatically assumed. Copyright protection is weaker than patent protection, but the duration of protection is considerably longer (e.g., a minimum of 50 years after the creator's death or 70 years under U.S. copyright protection). Although individual countries may have slight variations in their domestic copyright laws, as long as the country is a member of the international Berne Convention 4, the protection afforded will beat least at a minimum level, as dictated by the convention; unfortunately, not all countries are members. In the United States, copyright law protects the right of an author to control the public distribution, reproduction, display, and adaptation of his original work. The law covers many categories of work: pictorial, graphic, musical, dramatic, literary, pantomime, motion picture, sculptural, sound recording, and architectural. Copyright law does not cover the specific resource, as does trade secret law. It protects the expression of the idea of the resource instead of the resource itself. A copyright is usually used to protect an author's writings, an artist's drawings, a programmer's source code, or specific rhythms and structures of a musician's creation. Computer programs and manuals are just two examples of items protected under the Federal Copyright Act. The item is covered under copyright law once the program or manual has been written. Although including a warning and the copyright symbol (c) is not required, doing so is encouraged so others cannot claim innocence after copying another's work. The protection does not extend to any method of operations, process, concept, or procedure, but it does protect against unauthorized copying and distribution of a protected work. It protects the form of expression rather than the subject matter. Reference(s) used for this question: Hernandez CISSP, Steven (2012-12-21).
