NEW QUESTION: 1 HP Data Protector is usually: **A.** A product sold with EMC hardware **B.** Product sold with IBM hardware **C.** All of the above **D.** Product sold with HP hardware **Answer: D**

NEW QUESTION: 2 Loss of appetite for a child with leukemia is a major recurrent problem. The plan of care should be designed to: **A.** Help the child gain weight **B.** Make mealtimes pleasant **C.** Reinforce attempts to eat **D.** Increase his appetite **Answer: C** **Explanation:** (A) Ignoring refusals to eat and rewarding eating attempts are the most successful means of increasing intake. (B) This goal is not specific enough or related to the loss of appetite. (C) This goal is not possible at this time based on his illness. (D) This goal is helpful, but alone will not address his loss of appetite.

NEW QUESTION: 3 You have an analytics solution in Microsoft Azure that must be operationalized. You have the relevant data in Azure Blob storage. You use an Azure HDInsight Cluster to process the data. You plan to process the raw data files by using Azure HDInsight. Azure Data Factory will operationalize the solution. You need to create a data factory to orchestrate the data movement. Output data must be written back to Azure Blob storage. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. **Answer:** **Explanation:** **Explanation**

NEW QUESTION: 4 Your company plans to completely separate development and production assets such as datasets, reports, and dashboards in Microsoft Power BI. You need to recommend an application lifecycle strategy. The solution must minimize access to production assets and prevent end users from viewing the development assets. What should you recommend? **A.** In one workspace, create separate copies of the assets and append DEV to the names of the copied assets. Grant the end users access to the workspace. **B.** Create production reports in a separate workspace that uses a shared dataset from the development workspace. Grant the end users access to the production workspace. **C.** Create a workspace for development and a workspace for production. From the production workspace, publish an app. **D.** Create one workspace for development. From the new workspace, publish an app for production. **Answer: C** **Explanation:** Use different work stages (Development, Test, and Production). Deploy from the Development workspace. **Reference:** <https://visualbi.com/blogs/microsoft/powerbi/application-lifecycle-management-power-bi/>
