You can download the trial version of our P-SAPEA-2023 practice prep first.

NEW QUESTION: 1You have a Microsoft Azure Active Directory (Azure AD) tenant. Your company implements Windows Information Protection (WIP). You need to modify which users and applications are affected by WIP. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation Microsoft Intune has an easy way to create and deploy a Windows Information Protection (WIP) policy. You can choose which apps to protect, the level of protection, and how to find enterprise data on the network. The devices can be fully managed by Mobile Device Management (MDM), or managed by Mobile Application Management (MAM), where Intune manages only the apps on a user's personal device. The MAM User scope determines which users are affected by WIP. App protection policies are used to configure which applications are affected by WIP. Reference: <https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/crea>

NEW QUESTION: 2A technician wants to create a customized list of common utilities that are easily accessible in the same location.
