**A.** comparison  
**B.** comparison and partition  
**C.** partition and swap  
**D.** comparison and swap  
**Answer: D**

**NEW QUESTION: 2**A security administrator would like to ensure that system administrators are not using the same password for both their privileged and non-privileged accounts. Which of the following security controls BEST accomplishes this goal?  
**A.** Require shorter password expiration for privileged accounts  
**B.** Require shorter password expiration for non-privileged accounts  
**C.** Require a greater password length for privileged accounts  
**D.** Require different account passwords through a policy  
**Answer: D**  
**Explanation:**A password policy aka account policy enforcement can be configured in such a way so as to make sure that system administrators make use of different passwords for different accounts.  
**Incorrect Answers:**  
**B.** Password expiration does not enforce the use of different passwords for different accounts. It is used as a disablement tool.  
**C.** Shorter password expiration is still just a disablement tool and will not enforce the use of different passwords for different accounts.  
**D.** Password length serves to make it more complex so as to strengthen the password and not to enforce the use of different passwords for different accounts.
