So our website has published the three useful versions for you to choose.

**NEW QUESTION:** 1Many IT projects experience problems because the development time and/or resource requirements are underestimated. Which of the following techniques would provide the GREATEST assistance in developing an estimate of project duration?  
**A.** Rapid application development  
**B.** PERT chart  
**C.** Object-oriented system development  
**D.** Function point analysis  
**Answer: B**  
**Explanation:**Explanation/Reference:Explanation:A PERT chart will help determine project duration once all the activities and the work involved with those activities are known. Function point analysis is a technique for determining the size of a development task based on the number of function points. Function points are factors such as inputs, outputs, inquiries, logical internal files, etc. While this will help determine the size of individual activities, it will not assist in determining project duration since there are many overlapping tasks. Rapid application development is a methodology that enables organizations to develop strategically important systems faster while reducing development costs and maintaining quality, while object-oriented system development is the process of solution specification and modeling.

**NEW QUESTION: 2** Present value of a basis point (PVBP) is one of the ways to quantify the risk of a bond, and it measures: **A.** The percentage change in bond price when the yields change by 1%. **B.** The present value of the future cash flows of a bond calculated at a yield equal to 1%. **C.** The change in value of a bond when yields increase by 0.01%. **D.** The percentage change in bond price when yields change by 1 basis point. **Answer: C**

**NEW QUESTION: 3** **Answer:** Explanation: Explanation DES = Avoid 3DES = Legacy MD5 = Avoid SHA-1 = Legacy HMAC-MD5 = Legacy
