Objectives are safe and we protect our client's privacy, We offer 24/7 customer support to our esteemed users.

This makes you an expert in a specific networking field, Contact live chat to know more, Do you feel aimless and helpless when the VMCE_v12 exam is coming soon?

At the same time, we also hope that you can realize your dreams with our help.

NEW QUESTION: 1A university requires a significant increase in web and database server resources for one week, twice a year, to handle student registration. The web servers remain idle for the rest of the year. Which of the following is the MOST cost effective way for the university to securely handle student registration?**A.** Move the database servers and web servers to an elastic private cloud.**B.** Move the web servers to an elastic public cloud while keeping the database servers local.**C.** Virtualize the web servers locally to add capacity during registration.**D.** Move the database servers to an elastic private cloud while keeping the web servers local.**Answer: B****Explanation:**In cloud computing, elasticity is defined as the degree to which a system (or a particular cloud layer) autonomously adapts its capacity to workload over time.The dynamic adaptation of capacity, e.g., by altering the use of computing resources, to meet a varying workload is called "elastic computing". In general, an elastic cloud application or process has three elasticity dimensions, Cost, Quality, and Resources, enabling it to increase and decrease its cost, quality, or available resources, as to accommodate specific requirements.In this question, the web servers remain idle when they are not used for the rest of the year. Therefore, we should host the web servers in the elastic public cloud. This will be cost effective because we will not be charged for them while they are not in use. The database servers are not idle so they should be kept local.

NEW QUESTION: 2When building the sm-mapping between Employee Profile and Candidate Profile to which data model does the second field-id refer to?Please choose the correct answer. Response:**A.** CPT data model**B.** Succession data model**C.** JRDM data model**D.** CDM data model
Answer: B

NEW QUESTION: 3Hinweis: Diese Frage ist Teil einer Reihe von Fragen, die dasselbe Szenario darstellen. Jede Frage in der Reihe enthält eine einzigartige Lösung, die die angegebenen Ziele erreichen kann. Einige Fragensätze haben möglicherweise mehr als eine richtige Lösung, während andere möglicherweise keine richtige Lösung haben.Nachdem Sie eine Frage in diesem Abschnitt beantwortet haben, können Sie NICHT mehr darauf zurückkommen. Infolgedessen werden diese Fragen nicht im Überprüfungsbildschirm angezeigt.Sie verwalten ein virtuelles Netzwerk mit dem Namen VNet1, das in der Azure-Region West US gehostet wird. VNet1 hostet zwei virtuelle Maschinen mit den Namen VM1 und VM2, auf denen Windows Server ausgeführt wird.Sie müssen den gesamten Netzwerkverkehr von VM1 nach VM2 drei Stunden lang überprüfen.Lösung: In Performance Monitor erstellen Sie einen Data Collector Set (DCS). Erfüllt dies das Ziel?**A.** Ja**B.** Nein**Answer: B****Explanation:**ExplanationYou should use Azure Network Watcher.References:
