All these versions of AZ-801 training online questions include the key point information that you need to know to pass the test, AZ-801 braindumps vce is helpful for candidates who are urgent for AZ-801 certification.

The best study method is to study every question in the Configuring Windows Server Hybrid Advanced Services [Testing C_S4CPR_2408 Center](#) study material until you know why it is correct because some of the questions are slightly different in the actual exam.

There are three kinds of AZ-801 exam braindumps for your reference: the PDF, the Software and the APP online, You do not spend twice exam cost which is very high.

NEW QUESTION: 1You need to implement the Get() method in the bookstore Web API application to be able to find books by using an ad hoc query. Which method should you use?
A. Option B
B. Option D
C. Option A
D. Option C
Answer: B
Explanation: Topic 4, Adventure Works Cycles
General Overview Adventure Works Cycles is a travel agency for cycling enthusiasts. In recent years, Adventure Works Cycles has begun renting exotic cars to its clients. You are developing a new web application that will provide Adventure Works Cycles customers with the ability to locate and rent exotic throughout the world.
Application Overview The web application will be hosted in Azure. The application will provide users with the ability to search for a car by using advanced filtering options, such as the car brand, model, year, and price. All of this information will be stored as strings and will be displayed as drop-down lists. The brand and model lists that will be displayed on the home page of the web application will be retrieved from Windows Communication Foundation (WCF) services hosted in the on-premises environment. The home page will be named home.aspx and will be developed by using Microsoft ASP.NET MVC. The business logic will be developed by using ASP.NET Web API. The MVC front-end layer and the Web API will communicate by using JSON. The business logic will have a call to an assembly named CarBusinessLogic.dll. For responding, you are creating a worker role named ReportApp in Azure that will collect data from all of the searches made by using the web application. The application will communicate with ReportApp by using messages.
Requirements
Security Requirements Adventure Works Cycles identifies the following security requirements for the web application:
* The Web API must only accept one data format.
* The CarBusinessLogic.dll assembly must be strongly-named.
* Communication between the on-premises WCF service and Azure must be encrypted.
Logging Requirements In the Web API, you plan to create a controller named CarController. Before any action in CarController is executed, the following line of code must execute first: Debug.WriteLine("pre-processing logging");
Performance Requirements Adventure Works Cycles identifies the following performance requirements for the web application:
* After the initial deployment, any changes to the business logic of the Web API must cause minimal downtime to the web application in

the production environment.* The action in the Web API that returns the car brand must be asynchronous, while all other actions must be synchronous.* When home.aspx is displayed, the rendered page must be cached for 10 minutes.* The web application will be deployed to multiple instances.Financial RequirementsReportApp will shut down every night. However, data from the searches performed during the night must still be collected.

NEW QUESTION: 2Which of the following is an important step to take BEFORE moving any installation packages from a test environment to production?**A.** Roll back changes in the test environment**B.** Archive and compress the files**C.** Update the secure baseline**D.** Verify the hashes of files**Answer: D**

NEW QUESTION: 3Mit welchen Transaktionen können Sie einen Drillback zum Quelldokument durchführen? Hinweis: Auf diese Frage gibt es 2 richtige Antworten.**A.** Anzeige von CO-Dokumenten (KSB5)**B.** SLT-Monitor (LTRC)**C.** FI-Dokumentanzeige (FB03)**D.** Dokumentanzeige ändern (FSCD)**Answer: B,C**

NEW QUESTION: 4Welcher der folgenden Prozesse befindet sich in einer SELC-Phase (Systems Engineering Life Cycle)?**A.** Entwicklung und Bereitstellung**B.** Anforderungsanalyse**C.** Nutzungsunterstützung**D.** Produktionsbetrieb**Answer: B**
