For example, when classifying text documents might involve text segmentation and cleaning, extracting features, and training a classification model with cross-validation. Though there are many libraries we can use for each stage, connecting the dots is not as easy as it may look, especially with large-scale datasets. Most ML libraries are not designed for distributed computation or they do not provide native support for pipeline creation and tuning.Box 3:

**NEW QUESTION: 4** Hall, a divorced person and custodian of her 12-year old child, filed her 1990 federal income tax return as head of a household. She submitted the following information to the CPA who prepared her 1990 return: In 1990, Hall sold an antique that she bought in 1980 to display in her home. Hall paid \$800 for the antique and sold it for \$1,400, using the proceeds to pay a court ordered judgment. The \$600 gain that Hall realized on the sale of the antique should be treated as:**A.** A nontaxable antiquities transaction.**B.** Long-term capital gain.**C.** An involuntary conversion.**D.** Ordinary income.**Answer: B**  
Explanation: Explanation Choice "b" is correct. The gain should be treated as a long-term capital gain because the property was held for more than one year and was sold for more than its cost. Choice "a" is incorrect. Because Hall was not in the business of selling antiques, the profit from the sale will be treated as a gain from the disposition of a capital asset, not ordinary income. Choice "c" is incorrect. This transaction does not qualify as an involuntary conversion. In order to be treated as an involuntary conversion, the transaction must result from a condemnation of property or a destruction or loss from theft or casualty. Choice "d" is incorrect. An obvious distracter.
