Begin Your Preparation with Ericsson ECP-206 Real Questions, Photoexperienceacademy can help you pass the Ericsson exam once!

NEW QUESTION: 1You are the business analyst for your organization and you are working with Bill on creating a model. Bill is a little confused about all the different things a model can do for the stakeholders. You explain to Bill that a model can do all of the following except for which one?**A.** Define the risk and reward for the requirements**B.** Categorize and create hierarchies of items**C.** Define boundaries for business domains**D.** Show business logic**Answer: A****Explanation:** ExplanationModels do not address risk and reward for requirements. The risk identification and analysis process is responsible for identifying the risk to reward ration.**Answer C** is incorrect. Models do define boundaries for business domains and they can define the components within each boundary.**Answer B** is incorrect. Models do categorize requirements and they can create hierarchies of items within the categorization.**Answer D** is incorrect. Requirements can show business logic and link the requirements to goals, strategies, or the business value of the requirements.

NEW QUESTION: 2Since risk is associated with most projects, the best course of action is to:**A.** cover all project risks by buying appropriate insurance**B.** identify various risks and implement actions to mitigate their potential impact**C.** ignore the risks, since nothing can be done about them and move forward with the project in an expeditious manner.**D.** eliminate all known risks prior to the execution phase of the project**E.** avoid projects with clear and present risks**Answer: B**

NEW QUESTION: 3Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2. The domain contains two domain controllers. The domain controllers are configured as shown in the following table. The Branch site contains a perimeter network. For security reasons, client computers in the perimeter network can communicate with client computers in the Branch site only. You plan to deploy a new RODC to the perimeter network in the Branch site. You need to ensure that the new RODC will be able to replicate from DC10. What should you do first on DC10?**A.** Enable the Bridge all site links setting.**B.** Run the Active Directory Domain Services Configuration Wizard.**C.** Create an Active Directory site.**D.** Create an Active Directory site link bridge.**Answer: D****Explanation:** Explanation A. Site link transitivity is controlled by the Bridge all site links option on the properties pages of transport folders (such as IP or SMTP) in the Active Directory Sites and Services snapin. Site link transitivity is enabled by default.**B.C.** If you cannot place a writable Windows Server 2008 domain controller in the nearest site to the RODC, RODC replication depends on a site link bridge between the site links that contain the site of the RODC and the site of the writable Windows Server 2008 domain controller.**D.** AD Site not readed for RODC
