**NEW QUESTION: 1** Refer to the exhibit. Switch A, B, and C are trunked together and have been properly configured for VTP. Switch B has all VLANs, but Switch C is not receiving traffic from certain VLANs. What would cause this issue?  
**A.** A VTP authentication mismatch occurred between Switch A and Switch B.  
**B.** VTP pruning is configured globally on all switches and it removed VLANs from the trunk interface that is connected to Switch C.  
**C.** The VTP revision number of Switch B is higher than that of Switch A.  
**D.** The trunk between Switch A and Switch B is misconfigured.  
**Answer: B**  
Explanation: Explanation/Reference: Explanation: VTP pruning increases network available bandwidth by restricting flooded traffic to those trunk links that the traffic must use to reach the destination devices. Without VTP pruning, a switch floods broadcast, multicast, and unknown unicast traffic across all trunk links within a VTP domain even though receiving switches might discard them. VTP pruning is disabled by default. VTP pruning blocks unneeded flooded traffic to VLANs on trunk ports that are included in the pruning-eligible list. The best explanation for why switch C is not seeing traffic from only some of the VLANs, is that VTP pruning has been configured.

**NEW QUESTION: 2** When should a post-mortem review meeting be held after an intrusion has been properly taken care of?  
**A.** Within the first three months after the investigation of the intrusion is completed.  
**B.** Within the first week after prosecution of intruders have taken place, whether successful or not.  
**C.** Within the first week of completing the investigation of the intrusion.  
**D.** Within the first month after the investigation of the intrusion is completed.  
**Answer: C**  
Explanation: Explanation/Reference: A post-mortem review meeting should be held with all involved parties within three to five working days of completing the investigation of the intrusion. Otherwise, participants are likely to forget critical information. Even if it enabled an organization to validate the correctness of its chain of custody of evidence, it would not make sense to wait until prosecution is complete because it would take too much time and many cases of intrusion never get to court anyway.
