**NEW QUESTION: 1** Depending on configuration, which of the following two behaviors can the ASA classifier exhibit when receiving unicast traffic on an interface shared by multiple contexts? (Choose two.)  
**A.** Traffic is classified using the destination address of the packet using the connection table.  
**B.** Traffic is classified using the destination MAC address of the packet.  
**C.** Traffic is classified by copying and sending the packet to all the contexts.  
**D.** Traffic is classified using the destination address of the packet using the NAT table.  
**E.** Traffic is classified using the destination address of the packet using the routing table.  
**Answer: B, D**  
Explanation: Configuring static multicast routes lets you separate multicast traffic from unicast traffic. For example, when a path between a source and destination does not support multicast routing, the solution is to configure two multicast devices with a GRE tunnel between them and to send the multicast packets over the tunnel. When using PIM, the ASA expects to receive packets on the same interface where it sends unicast packets back to the source. In some cases, such as bypassing a route that does not support multicast routing, you may want unicast packets to take one path and multicast packets to take another. Static multicast routes are not advertised or redistributed.

**NEW QUESTION: 2** Which two statements describe source trees in a multicast environment? (Choose two.)  
**A.** Source trees can introduce latency in packet delivery  
**B.** Source trees guarantee the minimum amount of network latency for forwarding multicast traffic  
**C.** Source trees can create suboptimal paths between the source and the receivers  
**D.** Source trees use a single common root placed at some chosen point in the network  
**E.** Source trees create an optimal path between the source and the receivers  
**Answer: B, E**

**NEW QUESTION: 3** Your network contains an Active Directory domain named contoso.com. You create a domain security group named Group1 and add several users to it. You need to force all of the users in Group1 to change their password every 35 days. The solution must affect the Group1 users only. What should you do?  
**A.** From Active Directory Administrative Center, create a Password Setting object (PSO).  
**B.** Modify the Password Policy settings in a Group Policy object (GPO) that is linked to the domain, and then filter the GPO to Group1 only.  
**C.** From Windows PowerShell, run the Set-ADDomain cmdlet, and then run the Set-ADAccountPassword cmdlet.  
**D.** Create a forms authentication provider, and then set the forms authentication credentials.  
**Answer: A**

**NEW QUESTION: 4** During the quarterly review of the internal audit activity's performance, the

chief audit executive (CAE) notes that actual engagement hours consistently exceed the budget. Which of the following strategies would most likely help the CAE address this problem?  
\* The budget should consider time spent on similar engagements.\* The budget should consider the proficiency of the assigned auditors.\* The budget estimate should provide for unexpected delays.\* The budget should be specific as to time for each work assignment.**A.** 2 and 3 only**B.** 1 and 2 only**C.** 1 and 4 only**D.** 3 and 4 only**Answer: C**
